QUESTION 1

You have a Microsoft 365 E5 subscription.

A user attempts to send an email message to an external recipient and receives the following error message: "Your message couldn't be delivered because you weren't recognized as a valid sender. The most common reason for this is that

your email address is suspected of sending spam and it's no longer allowed to send messages outside of your organization. Contact your mail admin for assistance. Remote Server returned `550 5.1.8 Access denied, bad outbound sender\`."

You need to ensure that the user send email to external recipients.

What should you do?

- A. compliance management in the Exchange admin center
- B. Data loss prevention in the Security and Compliance admin center
- C. Threat management in the Security and Compliance admin center
- D. action center in the Exchange admin center

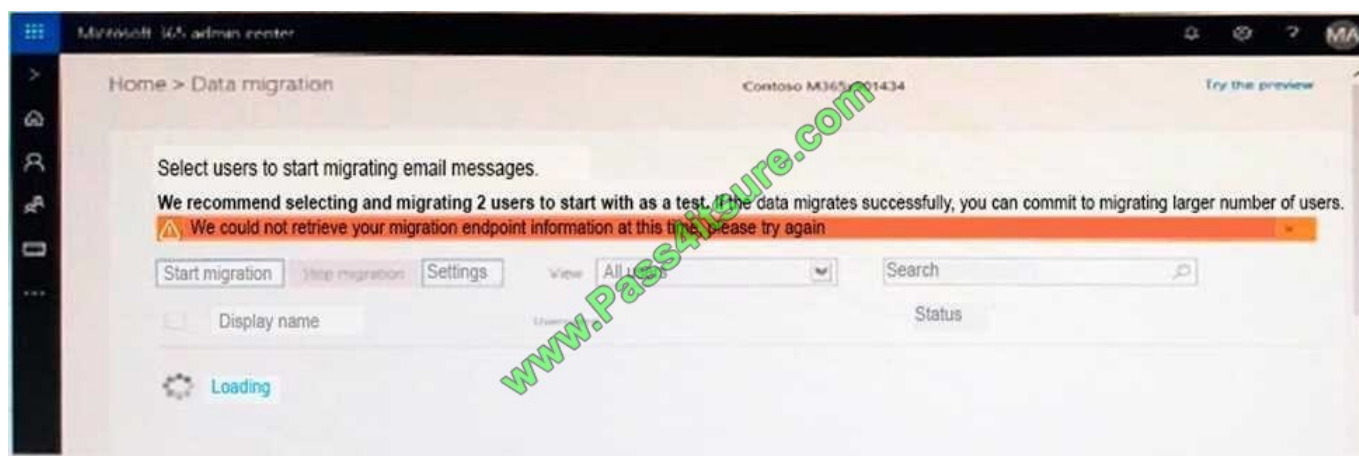

Correct Answer: D

QUESTION 3

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins_Brussels, RegionalAdmins_Munich,

RegionalAdmins_London, RegionalAdmins_Vienna and RegionalAdmins_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

Requirements

Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

Problem Statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to resolve the issue for the transport department users. What is the best way to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Move the public folder mailbox that contains TransportPF to a server in the main office.
- B. Move TransportPF to a public folder mailbox hosted in the main office.
- C. Modify the default public folder mailbox for all the transport department users.
- D. Instruct the transport department users to add TransportPF to their Favorites list in Outlook.

Correct Answer: B

References: <https://docs.microsoft.com/en-us/exchange/recipients/mailbox-moves?view=exchserver-2019>

QUESTION 4

You have a Microsoft Exchange Server 2019 organization.

You deploy a new mailbox server named EX01.

You need to ensure that EX01 can perform content filtering and sender filtering.

What should you run first?

- A. Install-UnifiedCompliancePrerequisite
- B. Set-transportAgent
- C. Install-AntiSpamAgents.ps1
- D. Set-MailboxJunkEmailConfiguration

Correct Answer: C

References: <https://docs.microsoft.com/en-us/exchange/antispam-and-antimalware/antispam-protection/antispam-on-mailbox-servers?view=exchserver-2019>

QUESTION 5

HOTSPOT

You have a Microsoft Exchange Server 2019 organization. You have a universal security group named group1 that contains three users named Admin1, Admin2, and Admin3.

You plan to make Admin1, Admin2, and Admin3 responsible for managing some of the Exchange objects in the organization.

You run the following commands.

```
New-ManagementRole -Name "Role1" -parent 'Mail Recipients'  
Get-managementRole "Role1" | Get-ManagementRoleEntry | Where name -notlike 'Get-*' | Remove-ManagementRoleEntry  
New-ManagementRoleAssignment -Role "Role1" -SecurityGroup "Group1"
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
Admin1 can create a distribution group.	<input type="radio"/>	<input type="radio"/>
Admin2 can move mailboxes.	<input type="radio"/>	<input type="radio"/>
Admin3 can view mailbox quotas.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
Admin1 can create a distribution group.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2 can move mailboxes.	<input type="radio"/>	<input checked="" type="radio"/>
Admin3 can view mailbox quotas.	<input type="radio"/>	<input checked="" type="radio"/>
