## QUESTION 1

Case Study : Litware, Inc.

Case Study

Overview

Litware, Inc. is food service supplier in Europe.

PhysicalLocations

Litware has a main office in Paris and branch offices in Munich, London, Brussels, Vienna, and Rome.

Each branch office has its own compliance officer.

ExistingEnvironment

The network contains one Active Directory forest named litware.com. The forest contains a single Active Directory domain. Each office is configured as an Active Directory site. Each branch office is represented organizational unit (OU) in an

OU named Offices in Active Directory.

Each branch office has a special Administrators group that contains the delegated administrators for that office. Each Administrators group is named based on its location in a format of RegionalAdmins\_Brussels, RegionalAdmins\_Munich,

RegionalAdmins\_London, RegionalAdmins\_Vienna and RegionalAdmins\_Rome.

NetworkInfrastructure

Each office contains two domain controllers from the litware.com domain. All the domain controllers are configured as DNS servers. All client computers connect only to the DNS servers in their respective office.

All offices have a high-speed connection to the Internet. Each office connects to the Internet by using a VPN appliance.

Each office has the following servers and client computers:

One reverse proxy appliance

One Microsoft Exchange Server 2019 server

One Windows Server Update Services (WSUS) server

Computers that run Windows 10 and have Microsoft Office 2019 installed. The office in Brussels contains an Exchange Server 2016 server that has the Unified Messaging role installed and hosted voicemail configured.

Mailboxes are hosted on all the Exchange servers. Public folders are hosted only on an Exchange server in the main office. Litware uses a disjoint namespace to access the servers. Each user has an archive mailbox. Archiving is configured

to use the default settings. Exchange services are published to the internet by using a reverse proxy in each office. A full backup of Exchange is performed nightly. Incremental backups occur every six hours. All the users in the transport

department connect to network resources by using a connection in the main office.

#### Requirements

#### Planned Changes

Litware plans to implement the following changes:

Implement calendar sharing to partner companies.

Implement a solution that prevents malware from being delivered to end users. Use personal archives to eliminate the need for PST files. Ensure the Brussels office and move all the users in the Brussels office to the main office. All the

mailboxes in the Brussels office will be moved to a server in the main office. Implement a compliance solution to ensure that items deleted from public folders are retained. If an item in a public folder is modified, the original version of the item

must be available.

#### Technical Requirements

Litware identifies the following technical requirements:

Minimize administrative effort.

Use the principle of least privilege.

Ensure that junk email is deleted automatically after 14 days. Ensure that sent items and deleted items are deleted automatically after 30 days. Ensure that users in the customer service department can open multiple mailboxes. Ensure that

all the former Brussels office users always maintain access to hosted voicemail. Ensure that the staff in the IT department can manage the email environment without end-user involvement.

Ensure that users cannot recover email messages that are deleted from the Junk Email folder and the Deleted Items.

Ensure that if an email message has a spam confidence level (SCL) of 3 or higher, the message automatically moves to the Junk Email folder.

#### Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

#### HOTSPOT

Use the drop-down menus to select the answer choice that complete each statement based on the information presented in the Exchange Online Connector exhibit.

NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

To meet the security requirements for the email messages received from fabrikam.com, set **(answer choice)** to \*, fabrikam.com.

AssociatedAcceptedDomains  
ConnectorSource  
SenderDomains

When an email message is sent from fabrikam.com to an on-premises mailbox, the message will be sent **(answer choice)**.

back to a sender in fabrikam.com  
to the Edge Transport server encrypted  
to the Edge Transport server unencrypted

Correct Answer:

**Answer Area**

To meet the security requirements for the email messages received from fabrikam.com, set **(answer choice)** to \*, fabrikam.com.

AssociatedAcceptedDomains  
ConnectorSource  
SenderDomains

When an email message is sent from fabrikam.com to an on-premises mailbox, the message will be sent **(answer choice)**.

back to a sender in fabrikam.com  
to the Edge Transport server encrypted  
to the Edge Transport server unencrypted

**QUESTION 2**

You have a Microsoft Exchange Server 2019 organization.

You purchase an Exchange Online subscription.

You plan to implement an Exchange hybrid deployment that supports the following features:

Federated sharing of free/busy information

Single-sign on (SSO) access to both on-premises and Exchange Online mailboxes.

Secured access to mailboxes by using Microsoft Azure Active Directory (Azure AD) conditional access policies.

A unified global address list (GAL) that contains all the mailboxes in the on-premises and Exchange Online organizations.

You plan to run the Microsoft Office 365 Hybrid Configuration wizard.

You are evaluating whether to use Exchange Classic Hybrid or Exchange Modern Hybrid.

Which requirement can only be met by using the Exchange Modern Hybrid connection option?

A. the federated sharing of free/busy information between organizations

- B. SSO access to both on-premises and Exchange Online mailboxes
- C. a unified GAL list that contains all the mailboxes in the on-premises and Exchange Online organizations
- D. secured access to mailboxes by using Azure AD conditional access policies.

Correct Answer: A

#### Problem statements

The transport department users report that accessing a public folder named TransportPF is sometimes very slow.

Users in the customer service department report that Microsoft Outlook sometimes hangs when many mailboxes are open.

You need to resolve the issue for the transport department users. What is the best way to achieve the goal? More than

one answer choice may achieve the goal. Select the BEST answer.

- A. Move the public folder mailbox that contains TransportPF to a server in the main office.
- B. Move TransportPF to a public folder mailbox hosted in the main office.
- C. Modify the default public folder mailbox for all the transport department users.
- D. Instruct the transport department users to add TransportPF to their Favorites list in Outlook.

Correct Answer: B

#### QUESTION 4

##### DRAG DROP

Your company named ADatum Corporation has a Microsoft 365 subscription.

ADatum acquires a company named Contoso, Ltd.

In the subscription, you create a new mailbox for each user at Contoso. You need to provide the Contoso users with a global address list (GAL) that contains only their email addresses.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

##### Actions

##### Answer Area

Create an address book policy (ABP) named Contoso-AB that uses the GAL.

Create a new set of address lists for the Contoso users.

Create an address book policy (ABP) named Contoso-AB that uses the new set of address lists.

Create a new GAL named Contoso GAL.

Assign Contoso-AB to all the mailboxes of the Contoso users.

Correct Answer:

**Actions****Answer Area**

	Create a new GAL named Contoso GAL.
Create a new set of address lists for the Contoso users.	Create an address book policy (ABP) named Contoso-AB that uses the GAL.
Create an address book policy (ABP) named Contoso-AB that uses the new set of address lists.	Assign Contoso-AB to all the mailboxes of the Contoso users.

**Answer Area**

Create a new GAL named Contoso GAL.
Create an address book policy (ABP) named Contoso-AB that uses the GAL.
Assign Contoso-AB to all the mailboxes of the Contoso users.

**QUESTION 5**

Your network contains an Active Directory forest. The forest functional label is Windows Server 2012 R2. The forest contains a Microsoft Exchange Server 2019 organization. Users access their mailbox by using Microsoft Outlook 2016.

You purchase a Microsoft 365 E5 subscription.

You plan to move 20 mailboxes to Exchange Online.

From Exchange Online, you attempt to perform a remote move migration. When you are prompted to select the users, you discover that there are no users to select. You need to ensure that you can migrate the users to Exchange Online by

using a remote move migration.

You need to ensure that you can migrate the users to Exchange Online by using a remote move migration.

What should you first?

- A. Create a new certificate.
- B. Upgrade the forest functional level.
- C. Prepare the Active Directory schema.
- D. Implement Active Directory synchronization.

Correct Answer: D
