**QUESTION 1****HOTSPOT**

You have a Microsoft Exchange Online tenant that contains a user named User1.

User1 has a retention policy to delete Inbox messages after 30 days.

User1 is going on extended leave and requires that the Inbox messages be retained during the user's absence.

You need to temporarily suspend the processing of the Inbox messages for User1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
User2 is included on the address list.	<input type="radio"/>	<input checked="" type="radio"/>
User3 is included on the address list.	<input checked="" type="radio"/>	<input type="radio"/>
Meeting Room 1 and Meeting Room 2 are included on the address list.	<input checked="" type="radio"/>	<input type="radio"/>

Correct Answer:

X-MS-Exchange-Organization-SCL:5

X-Microsoft-Antispam: BCL:7

X-Forefront-Antispam-Report: SCL:5;IPV:NLI;SFV:SPM

Reference: <https://docs.microsoft.com/en-us/exchange/security-and-compliance/messaging-records-management/mailbox-retention-hold>

QUESTION 2

You have a Microsoft Exchange Online tenant that contains a user named User1.

User1 needs to be able to search mailboxes and purge email.

To which role group should you add User1?

- A. eDiscovery Manager
- B. Organization Management
- C. Compliance Data Administrator
- D. Security Administrator

Correct Answer: B

To delete messages, you have to be a member of the Organization Management role group or be assigned the Search And Purge role in the compliance center.

Incorrect:

Not A: To create and run a Content search, you have to be a member of the eDiscovery Manager role group or be assigned the Compliance Search role in the Microsoft 365 compliance center.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/compliance/search-for-and-delete-messages-in-your-organization?view=o365-worldwide>

QUESTION 3

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

You are migrating mailboxes to Exchange Online by using remote mailbox move requests.

A recent security breach at the company required that the passwords of all privileged accounts be changed.

Since the password change, mailbox move requests are failing.

You need to ensure that the mailbox migration can resume.

What should you do first?

- A. From Exchange on-premises, run Set-MigrationEndpoint.
- B. From Exchange on-premises, run Set-MigrationConfig.
- C. From Exchange Online, run Set-MigrationConfig.
- D. From Exchange Online, run Set-MigrationEndpoint.
- E. Run iisreset /noforce on all the Exchange servers that have MRSPProxy enabled.

Correct Answer: A

Reference: <https://docs.microsoft.com/en-us/powershell/module/exchange/move-and-migration/set-migrationendpoint?view=exchange-ps>

QUESTION 4

DRAG DROP

You have a Microsoft Exchange Online tenant.

You enable hierarchical address books (HABs).

You create a new distribution group named Contoso.

You need to configure the Contoso group as the root of the hierarchy. The members of the group must appear in the hierarchy.

How should you complete the PowerShell commands? To answer, drag the appropriate cmdlets to the correct targets. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

```
Identity      : Outlook-Android/2.0 (UserAgent)
AccessLevel   : Allow
Characteristic : UserAgent
QueryString   : Outlook-Android/2.0
```

```
Identity      : Outlook-iOS/2.0 (UserAgent)
AccessLevel    : Allow
Characteristic : UserAgent
QueryString    : Outlook-iOS/2.0
```

Correct Answer:

Answer Area

Statements	Yes	No
iOS devices can use the Microsoft Outlook app to sync mailbox data.	<input type="radio"/>	<input type="radio"/>
Android devices can use the Microsoft Outlook app to sync mailbox data.	<input type="radio"/>	<input type="radio"/>
iOS devices can use the native Mail app to sync mailbox data.	<input type="radio"/>	<input type="radio"/>

Reference: <https://docs.microsoft.com/en-us/exchange/address-books/hierarchical-address-books/enable-or-disable-hierarchical-address-books>

QUESTION 5

You have a Microsoft 365 tenant that contains a user named User1.

Automatic email forwarding to mailboxes outside your company is blocked for the tenant.

You need to ensure that User1 can automatically forward email to an external recipient.

What should you do?

- A. Create an anti-phishing policy.
- B. Create an anti-spam policy.
- C. Modify the Tenant Allow/Block List.
- D. Create an anti-malware policy.

Correct Answer: B

The new method of blocking AutoForwarding is managed in Threat Management policies instead of Exchange transport rules. It is well hidden with a relatively new default policy called Outbound spam filter policy.

If you do have a need for email to be automatically forwarded from internal to an external destination, then a custom policy must be created to allow any exceptions.

You need to create the custom Outbound Spam policy.
