QUESTION 1

You plan to create two site collections named Project1 and Project2. The site collections will be used to collaborate with external users from partner companies. All the external users belong to partner companies that have their own Microsoft Azure Active Directory (Azure AD) tenant.

You have the following requirements for Project1 and Project2:

Internal users must be able to share the content in Project1 with the external users from only a partner company named Contoso, Ltd.

Internal users must be able to share the content in Project2 with users from any partner company

You need to configure the sharing settings and the domain-based filtering settings for each site collection.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
