**QUESTION 1****HOTSPOT**

You create a personal bot that you plan to distribute as a Microsoft Teams team app.

The bot has the following app manifest.

```
...
  "bots": [
    {
      "botId": "{botId0}",
      "scopes": [
        "personal"
      ],
      "supportsFiles": false,
      "isNotificationOnly": false,
      "commandLists": [
        {
          "scopes": [
            "personal"
          ],
          "commands": [
            {
              "title": "Hello",
              "description": "Sends a hello message and @mention the sender"
            }
          ]
        }
      ]
    }
  ],
  ...
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Hot Area:

Statements

You can use the bot in a 1:1 chat.

Yes	No
<input type="radio"/>	<input type="radio"/>

You can use the bot in a group chat.

<input type="radio"/>	<input type="radio"/>
-----------------------	-----------------------

You can invoke the bot from the compose box.

<input type="radio"/>	<input type="radio"/>
-----------------------	-----------------------

Correct Answer:

Statements

You can use the bot in a 1:1 chat.

Yes	No
<input type="radio"/>	<input checked="" type="radio"/>

You can use the bot in a group chat.

<input checked="" type="radio"/>	<input type="radio"/>
----------------------------------	-----------------------

You can invoke the bot from the compose box.

<input checked="" type="radio"/>	<input type="radio"/>
----------------------------------	-----------------------

QUESTION 2

You need to provide users with access to SalesApp. The solution must meet the technical requirements. What should you include in the solution?

- A. App Catalog in SharePoint Online
- B. sideloading
- C. Centralized Deployment
- D. Microsoft AppSource

Correct Answer: D

QUESTION 3

You have a SharePoint Framework (SPFx) web part named WebPartA that uses SPFx 1.11.0. You need to ensure that WebPartA can be installed as an app in Microsoft Teams. What should you do?

- A. Update the WebPartA.manifestjson file.
- B. Update the Config.json file.

- C. Upload WebPartA to the Microsoft Teams app catalog.
- D. From a command prompt, run the yo gmicrosoft/sharepoint command.

Correct Answer: C

QUESTION 4

You have a single-page application (SPA) named TodoListSPA and a server-based web app named TodoListService.

The permissions for the TodoListSPA API are configured as shown in the TodoListSPA exhibit. (Click the TodoListSPA tab.)

API / PERMISSIONS NAME	TYPE	DESCRIPTION	ADMIN CONSENT REQUIRED
▼ TodoListService-OBO-sample-v2 (1)			
user_impersonation	Delegated	Access TodoListService-OBO-sample-v2	-

The permissions for the TodoListService API are configured as shown in the TodoListService exhibit (Click the TodoListService tab.)

API / PERMISSIONS NAME	TYPE	DESCRIPTION
▼ Microsoft Graph (1)		
User.Read	Delegated	Sign in and read user profile

You need to ensure that TodoListService can access a Microsoft OneDrive file of the signed-in user. The solution must use the principle of least privilege. Which permission request should you configure?

- A. the sites.Read.All delegated permission for TodoListSPA
- B. the sites.Read.ah application permission for TodoListSPA
- C. the sites.Read.ah application permission for TodoListService
- D. the sites.Read.ah delegated permission for TodoListService

Correct Answer: C

QUESTION 5

You develop a web API named WebApi1.

When validating a token received from a client application, WebApi1 receives a MsalUiRequiredException exception from Azure Active Directory (Azure AD).

You need to formulate the response that WebApi1 will return to the client application.

Which HTTP response should you send?

- A. HTTP 307 Temporary Redirect
- B. HTTP 400 Bad Request
- C. HTTP 403 Forbidden
- D. HTTP 412 Precondition Failed

Correct Answer: D

The HyperText Transfer Protocol (HTTP) 412 Precondition Failed client error response code indicates that access to the target resource has been denied. This happens with conditional requests on methods other than GET or HEAD when the condition defined by the If-Unmodified-Since or If-None-Match headers is not fulfilled. In that case, the request, usually an upload or a modification of a resource, cannot be made and this error response is sent back.

MsalUiRequiredException

The "Ui Required" is proposed as a specialization of MsalServiceException named MsalUiRequiredException. This means you have attempted to use a non-interactive method of acquiring a token (e.g. AcquireTokenSilent), but MSAL could

not do it silently.

this can be because:

you need to sign-in

you need to consent

you need to go through a multi-factor authentication experience.

The remediation is to call AcquireTokenInteractive

```
try
{
app.AcquireTokenXXX(scopes, account)
WithYYYY(...)
ExecuteAsync()
}
catch(MsalUiRequiredException ex)
{
app.AcquireTokenInteractive(scopes)
WithAccount(account)
WithClaims(ex.Claims)
```

```
ExecuteAsync();
```

```
}
```
