**QUESTION 1**

Your company uses Microsoft Teams Calling Plans.

The company acquires a small development team. Currently, users on the team have their own direct inward dial (DID) numbers that have PSTN capabilities.

You migrate the users to Teams.

You need to ensure that you have phone numbers that you can assign to the users.

Solution: From the Microsoft Teams admin center, you place a new order for user numbers.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

#### QUESTION 4

##### HOTSPOT

You have a Microsoft Teams Phone deployment that contains a Session Border Controller (SBC) named SBC1.contoso.com.

Direct Routing integrates with a PBX phone system that uses only four-digit dialing and is configured to use the SBC.

Teams is configured to use dial plans that normalize any four-digit calls to E.164.

You have the following translation rule.

```
Identity: rule1
Name: rule1
Pattern: ^\+1(\d{10});ext=(\d{4})$
Translation: $2
```

You need to ensure that calls to the legacy PBX pass only a four-digit extension.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

### QUESTION 5

#### DRAG DROP

Your company has a main office in New York and a branch office in Calgary. All offices connect to each other by using a dedicated WAN.

You have a Microsoft Teams Phone deployment.

You need to recommend a Direct Routing solution that meets the following requirements:

If a Session Border Controller (SBC) fails in the New York office, PSTN services must remain available through a local PSTN egress in New York. The Calgary office must prioritize a local PSTN egress and ensure that PSTN services remain

available in the event of a local SBC outage.

The number of SBCs must be minimized.

What should you recommend for each office? To answer, drag the appropriate components to the correct offices. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll

to view content.

Select and Place:

**Components**

- A cross-site SBC pair
- A local redundant SBC pair
- A single SBC
- PSTN over WAN
