QUESTION 1

Kim, a technician, is configuring an 802.11n access point. Other WAPs on the network use 802.11b. Which of the following will Kim have to setup to make sure these WAPs will be able to communicate?

A. Enable mixed mode

B. Disable SSID

C. Disable encryption

D. Enable `n\\' only mode

Correct Answer: A

QUESTION 2

A technician attempts to replace a switch with a new one of similar model from the same vendor. When the technician moves the fiber and SFP plug, the switch does not completely boot up. Considering that the config files are the same, which of the following is the MOST likely cause of the failure?

A. Damaged fiber

B. Corrupted operating system

C. VLAN mismatch

D. Bad port

Correct Answer: B

QUESTION 3

A customer wants to install a network that can utilize 802.1X authentication protocols. The customer uses a Windows laptop and does not want to install any additional software; therefore, a technician needs to configure the network to work with what is available natively. Which of the following should the technician configure for the 802.1X network?

A. PEAP

B. LDAP

C. EAP-FAST

D. NAC

Correct Answer: B

QUESTION 4

A server rack was moved from one floor to another. The network engineer needs to determine what physical changes to make on the network to ensure the server rack has connectivity. Which of the following should the network engineer consult?

A. Standard operating procedures

B. Wiring diagram

C. Inventory documentation

D. Network baseline

Correct Answer: B

QUESTION 5

A developer has asked a network engineer for a small network segment of five computers connected via a Layer 1 device, configured in a star topology, and segregated from the corporate network. Which of the following would BEST fulfill the developer\\'s request?

A. Connect the five PCs to a hub that is not connected to the corporate network.

B. Connect the five PCs to a switching router and assign the PCs to a separate VLAN.

C. Connect the five PCs to a hardware firewall that is connected to the router.

D. Connect the five PCs to a switch and configure the ports with implicit deny ACLs for outbound traffic.

Correct Answer: A
