**QUESTION 1**

Which 3 FAS deduplication features were added in ONTAP 7.3?

- A. Qtree SnapMirror is supported on the destination for deduplication by enabling on the source, destination, or both systems.
- B. The fingerprint database and the change logs that the deduplication process uses are located outside the volume, in the aggregate.
- C. After breaking the deduplication volume destination mirror, the deduplication (a-sis) process continues uninterrupted.
- D. The deduplication schedule is not tied to a Qtree SnapMirror update, and can be configured just like the deduplication schedule for any volume.
- E. The deduplication fingerprint and change logs were moved to the root volume `/etc/dedup` directory.

Correct Answer: ABD

QUESTION 2

In an aggregate using a RAID-DP raid group, what is the minimum number of disks that are needed to create an aggregate so that it contains three data disks?

- A. 9 disks
- B. 7 disks
- C. 3 disks
- D. 5 disks

Correct Answer: C

QUESTION 3

Which three are valid commands to be used with LUNs?

- A. lun move
- B. lun copy
- C. lun clone
- D. lun offline
- E. lun rename

Correct Answer: ACD

QUESTION 4

How is a FlexClone volume different than a snapshot?

- A. A FlexClone volume is the same as a snapshot until you split the FlexClone to remove all restrictions on the parent.
- B. A FlexClone volume is a copy of all data blocks in a volume while a snapshot only references data blocks.
- C. A Flexclone volume is a writeable copy of a parent volume while a snapshot is read-only.
- D. A FlexClone volume is a separate copy of all data blocks within a parent volume that lives outside of the volumes while the snapshot lives within the volume.

Correct Answer: B

QUESTION 5

What is the purpose of the /etc/nsswitch.conf file?

- A. It exports a resource persistently.
- B. It determines the order of authentication.
- C. It maps a hostname to its IP address.
- D. It authenticates the users.

Correct Answer: B
