QUESTION 1

When running deduplication on SnapVault destinations, which 3 statements are true?

- A. The source (primary) system sends duplicated data even if the source data is deduplicated.
- B. Deduplication internally synchronizes with the SnapVault schedule on the destination.
- C. The source SnapVault data is deduplicated inline on the target before it is written to disk.
- D. Deduplication savings are available after the baseline snapshot rolls off and the blocks are freed.
- E. Deduplication with SnapVault creates a snapshot, deduplicates, then deletes and recreates the snapshot to effectively deduplicate savings.

Correct Answer: ABE

QUESTION 2

A storage administrator creates two volumes, vol1 located in aggr1 and vol2 located in aggr2. Junction paths for both of them are /vol1 and /vol2. The administrator performs a "volume move" operation and moved vol1 from aggr1 to aggr2. Which statement is true?

- A. The junction path changed for vol1 but not vol2.
- B. The junction path changed for vol2 but not vol1.
- C. The junction path changed for both vol1 and vol2.
- D. The junction path does not change for both vol1 and vol2.

Correct Answer: C

QUESTION 3

Which three are valid commands to be used with LUNs?

- A. lun move
- B. lun copy
- C. lun clone
- D. lun offline
- E. lun rename

Correct Answer: ACD

QUESTION 4

There are 16 SAS disks available for creating the aggregate; you use 14 disks to create a RAID DP aggregate. The RAID group size is 8 disks in a raid group.

Which statement is TRUE?

- A. You create 1 raid group of 16 disks.
- B. You create 2 raid groups of 6 disks each.
- C. You create 2 RAID groups one containing 8 disks and other containing 6 disks.
- D. You create 1 raid group of 12 disks.

Correct Answer: B

QUESTION 5

Physical Reallocation of a SnapMirror source volume increases the amount of data to transfer for the next SnapMirror update.

- A. True
- B. False

Correct Answer: B
