**QUESTION 1**

To log in to the cluster with OnCommand System Manager, a cluster administrator account must be authorized for which two application types? (Choose two.)

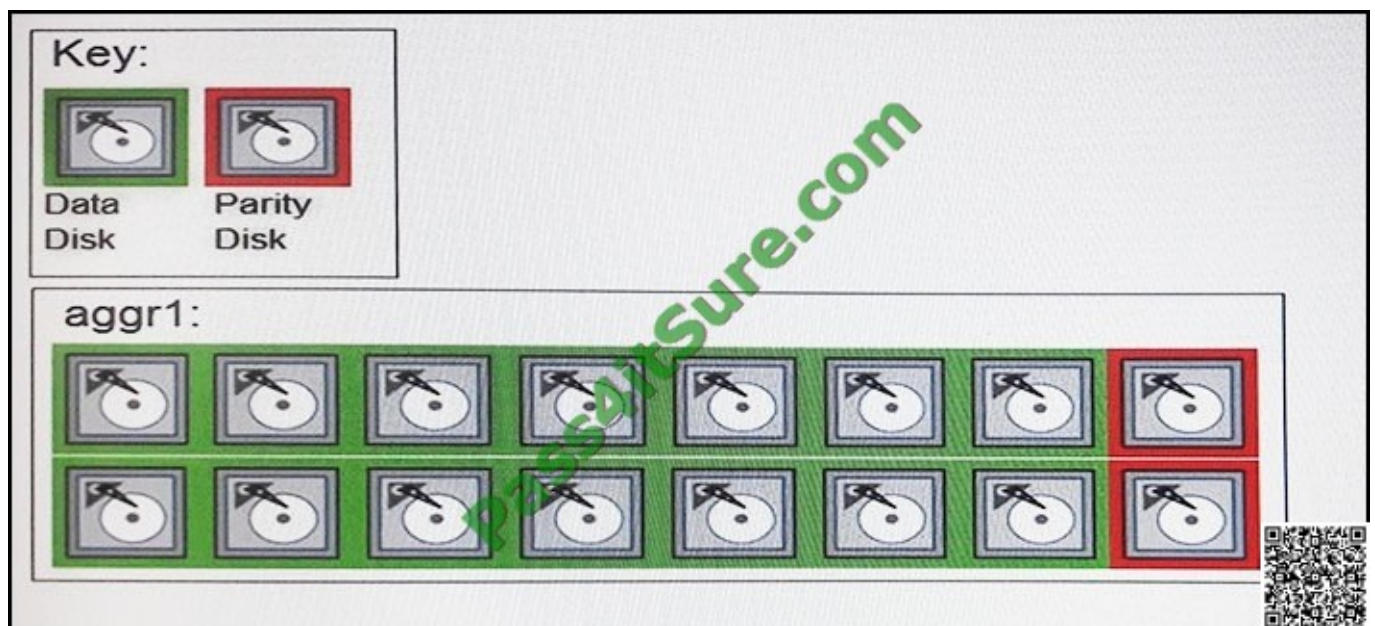

- A. HTTP
- B. SSH
- C. ONTAPI
- D. service processor

Correct Answer: AC

You must have a cluster user account configured with the admin role and the http, ontapi, and console application types.

QUESTION 2

Click the Exhibit button.

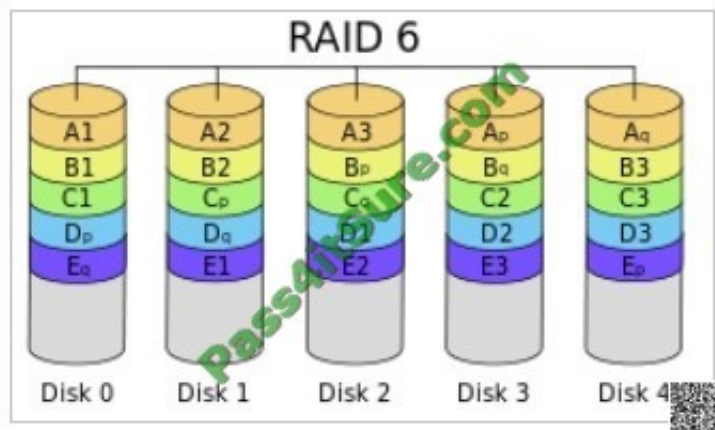

The size of the aggr1 RAID group shown in the exhibit is 8. What is the RAID type?

- A. RAID-TEC
- B. RAID-DP
- C. RAID4
- D. RAID0

Correct Answer: B

RAID 6 extends RAID 5 by adding another parity block; thus, it uses block-level striping with two parity blocks distributed across all member disks. Figure: Diagram of a RAID 6 setup, which is identical to RAID 5 other than the addition of a second parity block

QUESTION 3

At which level of granularity would you back up data to tape using the SMTape command?

- A. directory
- B. qtree
- C. volume
- D. aggregate

Correct Answer: C

You can use SMTape to perform volume backups to tapes.

QUESTION 4

You want to use UTA2 ports for native FC LUN access. How do you accomplish this task?

- A. Configure the UTA2 ports as target ports with 16 Gb SFP+ transceivers.
- B. Configure the UTA2 ports as target ports with 10 Gb SFP+ transceivers
- C. Configure the UTA2 ports as initiator ports with 10 Gb SFP+ transceivers
- D. Configure the UTA2 ports as initiator ports with 16 Gb SFP+ transceivers

Correct Answer: D

Native Fibre Channel drives attach directly to the Fibre Channel SAN, eliminating the need for a router.

NetApp uses the marketing term "UTA2" to refer to a new generation of network adapters that can be configured as either 10-Gb Ethernet and FCoE ports or as 16-Gb FC initiator or target ports.

QUESTION 5

You are configuring an ONTAP solution for FC host connectivity.

In this scenario, how should the cluster be configured? (Choose two.)

- A. The SVM must be configured for Ethernet LIFs.
- B. FC ports must be configured as initiators.
- C. FCP must be licensed on the cluster.
- D. FC ports must be configured as targets.

Correct Answer: AC

You can configure the FC and the FCoE protocols on the SVM for SAN hosts. LIFs are created on the most suitable adapters and assigned to port sets to ensure data path redundancy. Based on your requirements, you can configure either

FC, FCoE, or both the protocols.

Before you begin

The FCP license must be enabled on the cluster.

All the nodes in the cluster must be healthy.

Each node must have at least two correctly configured ports for each protocol (FC and FCoE).
