**QUESTION 1**

Click the Exhibit button.

You are designing a FlexPod Datacenter solution for Microsoft Windows 2012 with Hyper-V. All hosts will boot from the SAN, including management hosts. The management hosts are Cisco C-Series servers.

Referring to the exhibit, which adapters are required to boot the management servers from the SAN?

- A. two 1GbE NICs
- B. two 10GbE CNAs
- C. two 10GbE NICs
- D. two 8Gb HBAs

Correct Answer: C

QUESTION 2

A customer is configuring the UCS to handle a multitenant environment. The customer has created an organization within UCS for each tenant and would like to allow access to these organizations for only users that belong to that tenant.

In this scenario, which feature in UCS Manager should the customer use to accomplish this task?

- A. Locales
- B. Trusted Platform Module
- C. Service Profile
- D. User Roles

Correct Answer: C

QUESTION 3

A customer is planning to use a pair of MDS switches in a FlexPod design to host a few SAN workloads.

In this scenario, which two features should be enabled on the MDS switches for a successful configuration? (Choose two.)

- A. NPIV
- B. NPV
- C. port-channel-trunk
- D. fport-channel-trunk

Correct Answer: AC

QUESTION 4

A customer is designing a FlexPod Datacenter with Cisco UCS C-Series servers. They intend to manage the solution with Cisco UCS Manager. They want to cable the servers to the Cisco UCS Fabric Interconnects.

In this scenario, which three configurations are supported? (Choose three.)

- A. Cluster mode
- B. Direct Connect mode
- C. SingleConnect mode
- D. DualWire Management mode
- E. Multipath mode

Correct Answer: BCD

Dual-wire Management (Shared LOM): Shared LAN on Motherboard (LOM) ports on the rack server are used

exclusively for carrying management traffic. A separate cable connected to one of the ports on the PCIe card carries the data traffic. Using two separate cables for managing data traffic and management traffic is also referred to as dual-wire management. SingleConnect (Sideband): Using Network Controller Sideband Interface (NC-SI), the Cisco VIC card connects one cable that can carry both data traffic and management traffic. This feature is referred to as SingleConnect. Direct Connect Mode: Cisco UCS Manager supports an option to connect the Cisco UCS C-Series Rack-Mount Server directly to the FIs. This option enables Cisco UCS Manager to manage the Cisco UCS C-Series Rack-Mount Servers using a single cable for both management traffic and data traffic. The Cisco UCS VIC connects to the FI of the system. This connection uses a single connection from each VIC to each FI.

QUESTION 5

A customer is evaluating management tools for a new FlexPod infrastructure. They desire a tool that can orchestrate the provisioning of UCS compute nodes, NetApp storage, and VMware networking.

Which tool satisfies the requirements of this customer's heterogeneous environment?

- A. UCS Central
- B. NetApp OnCommand Unified Manager
- C. NetApp OnCommand Insight
- D. UCS Director

Correct Answer: D
