QUESTION 1

After replacing a failed disk, the disk does not appear as a spare on any node in the cluster.

What should be done to correct this problem?

A. Physically remove the disk and re-seat it firmly in the storage bay.

B. Physically remove and re-seat each IOM in the shelf, one at a time.

C. Assign ownership of the replaced disk to a node.

D. Add the disk into an aggregate on either node.

Correct Answer: C

QUESTION 2

You are adding an additional node to a single-node cluster.

Which of the actions should be performed after this upgrade? (Choose two.)

A. Verify that HA is enabled.

B. Verify that epsilon is not assigned.

C. Verify that epsilon is assigned.

D. Verify that HA is disabled.

Correct Answer: CD

QUESTION 3

Users are experiencing Kerberos authentication problems when attempting to access CIFS shares on the AcmeFS01 SVM. However, users are able to access shares hosted on Windows servers. You verify that network connectivity, between the SVM and the domain controllers, is working correctly.

What should you do to troubleshoot the authentication issue?

A. Ensure that the time on the ONTAP cluster is correct.

B. Verify that the users\\' computers can resolve DNS hostnames.

C. Verify that the users\\' computers can ping the SVM data LIF.

D. Verify that the SVM data LIF is on its home port.

Correct Answer: B

QUESTION 4

A customer has added a new user account, "jsmith", on a UNIX NFS client using the /etc/passwd file on that client. The NFS client has a mount, "/mountpoint", to an NTFS security style volume from an ONTAP SVM using NFSv3. The user "jsmith" does not exist in the Windows domain. The user "jsmith" must be able to access this mount, but cannot. According to company security policy, the customer cannot add the user "jsmith" to the Active Directory configuration.

Which two actions will solve the problem? (Choose two.)

A. Enable default Windows users for unknown UNIX users.

B. From the UNIX client, use the chown -R jsmith command /mountpoint.

C. Add the user to the /etc/passwd file on the storage controller.

D. Configure the default Windows user to allow access to the proper SMB data.

Correct Answer: BD

QUESTION 5

You have severe database performance issues with a server connected to 8-Gb FC switches to storage. You know that the problem is not the storage because the QoS output indicates that the issue is outside the controller. You need to examine each piece of the chain, such as switch port status and the host contribution to latency.

In this scenario, which NetApp product would provide the required information?

A. OnCommand Unified Manager

B. OnCommand Insight

C. SnapDrive

D. OnCommand Performance Manager

Correct Answer: D
