### QUESTION 1

The transfer of encrypted files or the use of encrypted protocols between users and servers on the internet can frustrate the efforts of administrators attempting to monitor traffic passing through the FortiGate unit and ensuring user compliance to corporate rules.

Which of the following items will allow the administrator to control the transfer of encrypted data through the FortiGate unit? (Select all that apply.)

- A. Encrypted protocols can be scanned through the use of the SSL proxy.
- B. DLP rules can be used to block the transmission of encrypted files.
- C. Firewall authentication can be enabled in the firewall policy, preventing the use of encrypted communications channels.
- D. Application control can be used to monitor the use of encrypted protocols; alerts can be sent to the administrator through email when the use of encrypted protocols is attempted.

Correct Answer: ABD

### QUESTION 2

When browsing to an internal web server using a web-mode SSL VPN bookmark, from which of the following source IP addresses would the web server consider the HTTP request to be initiated?

- A. The remote user's virtual IP address.
- B. The FortiGate unit's internal IP address.
- C. The remote user's public IP address.
- D. The FortiGate unit's external IP address.

Correct Answer: B

### QUESTION 3

Examine the firewall configuration shown below; then answer the question following it.

Create New Edit Delete Section View Global View											
Seq.#	From	To	Source	Destination	Service	Action	Schedule	Authentication	NAT	Log	UTM Profile
1	port3	port1	all			ACCEPT					
1.1			all	all	ALL		always	training			
2	any	any	any	any	ALL	DENY	always				

Which of the following statements are correct based on the firewall configuration illustrated in the exhibit? (Select all that apply.)

- A. A user can access the Internet using only the protocols that are supported by user authentication.

B. A user can access the Internet using any protocol except HTTP, HTTPS, Telnet, and FTP. These require authentication before the user will be allowed access.

C. A user must authenticate using the HTTP, HTTPS, SSH, FTP, or Telnet protocol before they can access any services.

D. A user cannot access the Internet using any protocols unless the user has passed firewall authentication.

Correct Answer: AD

---

#### QUESTION 4

What statements are true regarding RAID? (Choose three.)

A. RAID is supported on all FortiAnalyzer models (both hardware appliances and virtual appliances).

B. RAID backs up log information.

C. RAID requires multiple identical drives.

D. RAID levels determine how data is distributed across drives.

E. RAID status is available via the CLI only.

Correct Answer: CDE

---

#### QUESTION 5

How is traffic routed onto an SSL VPN tunnel from the FortiGate unit side?

A. A static route must be configured by the administrator using the ssl.root interface as the outgoing interface.

B. Assignment of an IP address to the client causes a host route to be added to the FortiGate unit's kernel routing table.

C. A route back to the SSLVPN IP pool is automatically created on the FortiGate unit.

D. The FortiGate unit adds a route based upon the destination address in the SSL VPN firewall policy.

Correct Answer: B
