**QUESTION 1**

What will be the result of reverting to a previous revision version in the revision history?

- A. It will install configuration changes to managed device automatically
- B. It will tag the device settings status as Auto-Update
- C. It will generate a new version ID and remove all other revision history versions
- D. It will modify the device-level database

Correct Answer: D

QUESTION 2

An administrator configures a new firewall policy on FortiManager and has not yet pushed the changes to the managed FortiGate.

In which database will the configuration be saved?

- A. Device-level database
- B. Revision history database
- C. ADOM-level database
- D. Configuration-level database

Correct Answer: C

QUESTION 3

You are moving managed FortiGate devices from one ADOM to a new ADOM. Which statement correctly describes the expected result?

- A. Any pending device settings will be installed automatically
- B. Any unused objects from a previous ADOM are moved to the new ADOM automatically
- C. The shared policy package will not be moved to the new ADOM
- D. Policy packages will be imported into the new ADOM automatically

Correct Answer: C

QUESTION 4

What does a policy package status of Conflict indicate?

- A. The policy package reports inconsistencies and conflicts during a Policy Consistency Check.
- B. The policy package does not have a FortiGate as the installation target.
- C. The policy package configuration has been changed on both FortiManager and the managed device independently.
- D. The policy configuration has never been imported after a device was registered on FortiManager.

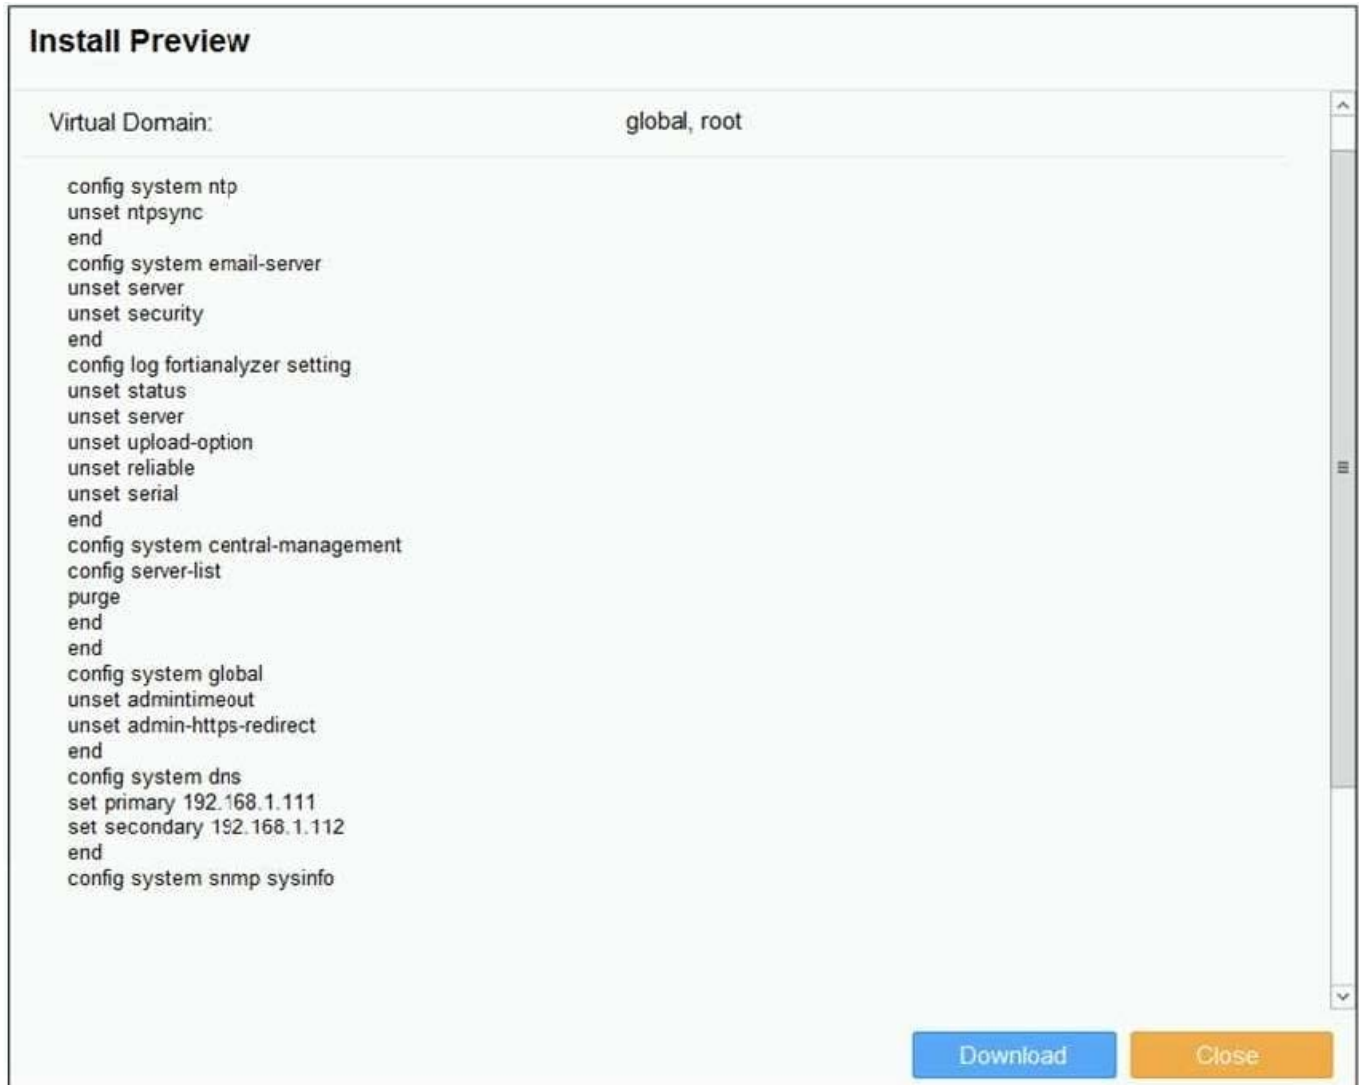

Correct Answer: C

QUESTION 5

Refer to the exhibits. Exhibit one.

The screenshot displays the FortiManager GUI with several configuration panels. The 'DNS' panel is highlighted with a red box, showing fields for Primary DNS Server (192.168.1.111), Secondary DNS Server (192.168.1.112), and Local Domain Name. Below it is the 'Alert Email' panel with fields for SMTP Server, Authentication (checkbox), SMTP User, and Password. The 'SNMP' panel shows the SNMP Agent enabled, with sections for SNMP v1/v2c and SNMP v3. To the right, the 'NTP Server' panel has a checkbox for 'Synchronize with NTP Server'. Below that is the 'Admin Settings' panel with fields for HTTP Port (80), HTTPS Port (443), SSH Port (22), SSH v1 compatibility (OFF), Idle Timeout (5), Enable SCP (OFF), and Switch Controller (OFF). The 'Replacement Message' panel at the bottom right shows a table with columns for Name and Description, listing various system messages like Administration, Alert Email, Authentication, Device Detection Portal, and Email.

Exhibit two.

An administrator created a new system template named Training with two new DNS addresses on FortiManager. During the installation preview stage, the administrator notices that many unset commands need to be pushed.

What can be the main reason for these unset commands?

- A. The DNS addresses in the default system settings are the same as the Training system template
- B. The Training system template has other default settings
- C. The ADOM is locked by another administrator
- D. The Training system template does not have assigned devices

Correct Answer: B
