**QUESTION 1**

What will be the result of reverting to a previous revision version in the revision history?

- A. It will install configuration changes to managed device automatically
- B. It will tag the device settings status as Auto-Update
- C. It will generate a new version ID and remove all other revision history versions
- D. It will modify the device-level database

Correct Answer: D

**QUESTION 2**

View the following exhibit.

The screenshot displays the FortiManager GUI. The top navigation bar includes 'Device Manager', 'Device & Groups', 'Firmware', and 'License'. The 'Device Manager' section is active, showing a list of devices under 'Managed FortiGate'. The list includes 'Local-FortiGate', 'Remote-FortiGate', 'root [NAT] (Management)', 'Student[NAT]', and 'Trainer [NAT]'. A red box labeled 'Managed FortiGate devices' highlights this list.

Below the device list, the 'Policy Packages' section is visible. The 'Install' tab is selected, showing a list of installation targets. The list includes 'Installation Target', 'Remote-FortiGate', 'root [NAT][Management]', 'Student[NAT]', and 'Local-PortiGate'. A red box labeled 'Installation targets' highlights this list.

The 'Policy Package' section is also visible, showing a list of policy packages. The 'Install' tab is selected, showing a table of installation targets. The table has columns: 'Seq.#', 'Install On', 'Name', 'From', and 'To'. The table contains three rows:

Seq.#	Install On	Name	From	To
1	Remote-FortiGate(Student)	Ping_Access	port3	port1
2	Local-FortiGate(root)	Web	port3	port1
3	Installation Targets	Source_Device	port3	port1

A red box labeled 'Policy Package' highlights the table.

Given the configurations shown in the exhibit, what can you conclude from the installation targets in the Install On

column?

- A. The Install On column value represents successful installation on the managed devices
- B. Policy seq#3 will be installed on all managed devices and VDOMs that are listed under Installation Targets
- C. Policy seq#3 will be installed on the Trainer[NAT] VDOM only
- D. Policy seq#3 will be not installed on any managed device

Correct Answer: B

### QUESTION 3

Refer to the exhibit.

```
FortiManager # diagnose dvm device list
--- There are currently 1 devices/vdoms managed ---

TYPE      OID    SN      HA    IP      NAME      ADOM    IPS      FIRMWARE
fmg/faz   enabled 157     FGVM01.. -    10.200.1.1    Local-FortiGate    My_ADOM    14.00641 (regular) 6.0 MR2 (866)
|- STATUS: dev-db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up

|- vdom:[3]root flags:0 adom:My_ADOM pkg:[imported]Local-FortiGate
```

Which two statements about the output are true? (Choose two.)

- A. The latest revision history for the managed FortiGate does match with the FortiGate running configuration
- B. Configuration changes have been installed to FortiGate and represents FortiGate configuration has been changed
- C. The latest history for the managed FortiGate does not match with the device-level database
- D. Configuration changes directly made on the FortiGate have been automatically updated to device-level database

Correct Answer: AC

STATUS: dev-db: modified; conf: in sync; cond: pending; dm: retrieved; conn: up?dev-db: modified ?This is the device setting status which indicates that configuration changes were made on FortiManager.?conf: in sync ?This is the sync status which shows that the latest revision history is in sync with Fortigate's configuration.?cond: pending ?This is the configuration status which says that configuration changes need to be installed. Most probably a retrieve was done in the past (dm: retrieved) updating the revision history DB (conf: in sync) and FortiManager device level DB, now there is a new modification on FortiManager device level DB (dev-db: modified) which wasn't installed to FortiGate (cond: pending), hence; revision history DB is not aware of that modification and doesn't match device DB.  
Conclusion:?Revision DB does match FortiGate.?No changes were installed to FortiGate yet.?Device DB doesn't match Revision DB.?No changes were done on FortiGate (auto-update) but configuration was retrieved instead After an Auto-Update or Retrieve:device database = latest revision = FGT Then after a manual change on FMG end (but no install yet):latest revision = FGT (still) but now device database has been modified (is different). After reverting to a previous revision in revision history:device database = reverted revision != FGT

### QUESTION 4

An administrator's PC crashes before the administrator can submit a workflow session for approval. After the PC is

restarted, the administrator notices that the ADOM was locked from the session before the crash. How can the administrator unlock the ADOM?

- A. Restore the configuration from a previous backup.
- B. Log in as Super\_User in order to unlock the ADOM.
- C. Log in using the same administrator account to unlock the ADOM.
- D. Delete the previous admin session manually through the FortiManager GUI or CLI.

Correct Answer: D

---

### QUESTION 5

An administrator is in the process of moving the system template profile between ADOMs by running the following command:

```
execute improfile import-profile ADOM2 3547 /tmp/myfile
```

Where does the administrator import the file from?

- A. File system
- B. ADOM1
- C. ADOM2 object database
- D. ADOM2

Correct Answer: D
