**QUESTION 1**

Which two statements about the self-service portal are true? (Choose two)

- A. Self-registration information can be sent to the user through email or SMS
- B. Realms can be used to configure which self-registered users or groups can authenticate on the network
- C. Administrator approval is required for all self-registration
- D. Authenticating users must specify domain name along with username

Correct Answer: AB

QUESTION 2

Which two SAML roles can FortiAuthenticator be configured as? (Choose two)

- A. Identity provider
- B. Principal
- C. Assertion server
- D. Service provider

Correct Answer: AD

QUESTION 3

Which network configuration is required when deploying FortiAuthenticator for portal services?

- A. FortiAuthenticator must have the REST API access enable on port1
- B. One of the DNS servers must be a FortiGuard DNS server
- C. Fortigate must be setup as default gateway for FortiAuthenticator
- D. Policies must have specific ports open between FortiAuthenticator and the authentication clients

Correct Answer: D

QUESTION 4

Which option correctly describes an SP-initiated SSO SAML packet flow for a host without a SAML assertion?

- A. Service provider contacts identity provider, identity provider validates principal for service provider, service provider establishes communication with principal

B. Principal contacts identity provider and is redirected to serviceprovider, principal establishes connection with service provider, service provider validates authentication with identity provider

C. Principal contacts service provider, service provider redirects principal to identity provider, after successful authentication identity provider redirects principal to service provider

D. Principal contacts identity provider and authenticates, identity provider relays principal to service provider after valid authentication

Correct Answer: C

QUESTION 5

How can a SAML metadata file be used?

A. To define a list of trusted user names

B. To import the required IDP configuration

C. To correlate the IDP address to its hostname

D. To resolve the IDP realm for authentication

Correct Answer: B
