QUESTION 1

View the following FortiGate configuration.

```
config system global
  set snat-route-change disable
end
config router static
  edit 1

    set gateway 10.200.2.254
    set priority 10
    set device "port2"
  next
end
```

All traffic to the Internet currently egresses from port1. The exhibit shows partial session information for Internet traffic from a user on the internal network:

```
# diagnose sys session list

- A. The session would remain in the session table, and its traffic would still egress from port1.
- B. The session would remain in the session table, but its traffic would now egress from both port1 and port2.

C. The session would remain in the session table, and its traffic would start to egress from port2.
