QUESTION 4

Refer to the exhibit.

```
config vpn ipsec phase1-interface
  edit Hub
    set add-route enable
    set net-device disable
    set tunnel-search nexthop
  next
end

172.16.1.3 0
```

Which two statements about the IPsec VPN configuration and the status of the IPsec VPN tunnel are true? (Choose two.)

- A. FortiGate creates separate virtual interfaces for each dial-up client.
- B. FortiGate creates a single IPsec virtual interface that is shared by all clients.
- C. FortiGate maps the remote gateway 100.64.3.1 to tunnel index interface 1.
- D. FortiGate does not install IPsec static routes for remote protected networks in the routing table.

Correct Answer: BC

If net-device is disabled, FortiGate creates a single IPSEC virtual interface that is shared by all IPSEC clients connecting to the same dialup VPN. In this case, the tunnel-search setting determines how FortiGate learns the network behind each remote client.

QUESTION 5

- A. It enables the SD-WAN rule to load balance and assign traffic with a route tag
- B. It tags each route and references the tag in the routing table.
- C. It uses route tags for a BGP community and assigns the SD-WAN rules with same tag.
- D. It ensures route tags match the SD-WAN rule based on the rule order
