QUESTION 1

After you turn on Desktop SSO, a default DSSO related routing rule is created. You must configure the network information for this rule.

Solution: The statement is true

A. Yes

B. No

Correct Answer: A

QUESTION 2

There might be specific AD attributes, which - apart from others - do not appear in the Okta user profile. Can those extra attributes be mapped and provisioned towards an app?

Solution: No, it is not possible as Okta queries the whole AD schema and retrieves everything that it's able to

A. Yes

B. No

Correct Answer: B

QUESTION 3

After you turn on Desktop SSO, a default DSSO related routing rule is created. You must configure the network information for this rule.

Solution: The statement is partially true, as the networking information is already added within this rule

A. Yes

B. No

Correct Answer: B

QUESTION 4

In Okta's KB articles the set of functions under the 'Provisioning' concept are referred to as CRUD. This is a concept you also meet when referring to CRUD APIs. What about its meaning here, in Okta's vision?

Solution: In 'Provisioning', CRUD stands for Create, Read, Upload, Deprovision

A. Yes

B. No

Correct Answer: B

QUESTION 5

When does Okta bring LDAP groups into Okta? Solution: During both LDAP import and JIT

A. Yes

B. No

Correct Answer: A
