### QUESTION 1

An analyst applies changes to a Modeler stream through the Modeler client and stores the stream to the repository. Still, the users opening the saved stream do not find the changes.

What would be the likely cause?

- A. The analyst forgot to save the changes.
- B. The users have no permission to the stream.
- C. The repository was not re-indexed after the stream update.
- D. The analyst forgot to move the production label to the latest version when storing the stream.

Correct Answer: D

---

### QUESTION 2

Regarding the database that is to be used for the CandDS repository, which statement must be true?

- A. The database must have encryption enabled.
- B. The database must be created manually prior to installation.
- C. The database server must be ended during installation.
- D. The database server must be installed on the same system that CandDS is installed on.

Correct Answer: B

---

### QUESTION 3

If the keystore file that is generated during the CandDS installation is inadvertently deleted from the system, which of the following steps must be performed to recover?

- A. Execute the genkey utility within the \bin directory.
- B. Enable encryption within the Tools => Security menu.
- C. Manually create a new keystore file in the expected location.
- D. CandDS will need to be reinstalled.

Correct Answer: D

---

### QUESTION 4

Within the Deployment Manager client, which of the following methods can be used to upload a file into the repository?
