**QUESTION 1**

A report that has been archived into OnDemand suddenly fails to load. The OnDemand system administrator investigates and determines that the format of the report has changed. What action should be taken?

- A. modify the view information in the application
- B. modify the indexer parameters in the application
- C. modify the load information in the application
- D. modify the field information in the application group

Correct Answer: B

QUESTION 2

An SSN (Social SecurityNumber) is a common database field for many applications, but the format of the SSN on different documents can vary. For example, one document uses a 9 digit SSN without dashes or spaces (xxxxxxxxx), another includes spaces (xxx xx xxxx), and a third includes dashes (xxx-xx-xxxx).

Which one of the following methods is used to store the SSN from all applications in a single format?

- A. Specify a default format option for the SSN field in each application
- B. Remove embedded dash and space characters from theSSN field in each application
- C. Remove embedded dash and space characters from the SSN field in the application group
- D. Use the MASK option in the FIELD index parameter statement to ignore dashes and spaces in the SSN field

Correct Answer: B

QUESTION 3

A company wants to purchase and implement OnDemand to archive customer billing statements. Due to the amount of data to be archived, they want to use Tivoli Storage Manager (TSM) to store all statements older than one year on cartridge tape. The company doesn plan to implementwant to use Tivoli Storage Manager (TSM) to store all statements older thanone year on cartridge tape. The company doesn\\t plan to implement TSM until next year and is asking questions about the logic of their plan.

What is your response?

- A. OnDemand and TSM must be installed at the same time to accomplish their goal.
- B. OnDemand can be installed now and TSM can be added at any time in the future with no special considerations.
- C. OnDemand can be installed now and TSM can be added at any time in the future as long as any storage sets are created with this in mind.

D. OnDemand can be installed now and TSM can be added at any time in the future, but any data archived before TSM is installed will have to be reloaded.

Correct Answer: C

QUESTION 4
