**QUESTION 1**

If a folder is configured to include a text search field, the text search is performed where?

- A. on the client
- B. on the library server
- C. on an object server
- D. user specified

Correct Answer: C

QUESTION 2

A new application group is being created to store a report with the following characteristics:

monthly report, 200MB per report, 1000 documents in each report, ASCII line data, and average compression ratio of report files is 10 to 1. The company wants to keep the reports in cache storage for 3 years and allow a 10% buffer to

accommodate possible growth in report size.

How much space in cache storage will be required to store this report?

- A. 80MB
- B. 264MB
- C. 792MB
- D. 7920MB

Correct Answer: C

QUESTION 3

A company wants to purchase and implement OnDemand to archive customer billing statements. Due to the amount of data to be archived, they want to use Tivoli Storage Manager (TSM) to store all statements older than one year on cartridge tape. The company doesn't plan to implement TSM until next year and is asking questions about the logic of their plan.

What is your response?

- A. OnDemand and TSM must be installed at the same time to accomplish their goal.
- B. OnDemand can be installed now and TSM can be added at any time in the future with no special considerations.

C. OnDemand can be installed now and TSM can be added at any time in the future as long as any storage sets are created with this in mind.

D. OnDemand can be installed now and TSM can be added at any time in the future, but any data archived before TSM is installed will have to be reloaded.

Correct Answer: C

QUESTION 4

Which of the following operating systems is not supported by OnDemand?

A. AIX

B. HP-UX

C. i5/OS

D. Linux

E. Solaris

F. Windows

G. z/OS

H. All of the above are supported

Correct Answer: H

QUESTION 5

Company policy requires that application development and testing be isolated from production systems. With respect to OnDemand, which of the following options best satisfies this policy?

A. Use separate application groups, applications, folders and user accounts for development and testing

B. Install another copy of OnDemand on a different server for development and testing

C. Create a second object server for development and testing

D. Create a second OnDemand instance for development and testing

Correct Answer: D
