**QUESTION 1**

Which of the following options describes correct cluster caching facility states when both primary and secondary cluster caching facilities are in sync?

A. primary: PRIMARY secondary: SECONDARY

B. primary: SYNC secondary: SYNC

C. primary: PRIMARY secondary: PEER

D. primary: PEER secondary: CATCHUP

Correct Answer: C

QUESTION 2

Consider the scenario of a DB2 pureScale environment with two DB2 members, and assume there is an active connection to "member 3". Due to some maintenance emergency, "member 3" needs to be stopped. Which one of the following commands will stop "member 3"?

A. db2stop force member 3

B. db2stop immediate member 3

C. db2stop node 3 all members

D. db2stop member 3

Correct Answer: A

QUESTION 3

Which one of the following sentences does NOT describe a benefit of Temporal Tables?

A. Temporal tables increase business insight by letting analysts understand how the business was doing in the past, what has changed in the present, what are the projections for the future.

B. Temporal tables lower costs by eliminating the complexity for businesses to develop their own temporal support infrastructure, such as additional tables, triggers, and application logic.

C. Temporal tables allow better data management by letting the application control data integrity and uniqueness.

D. Temporal tables provide a quick and easy way to track and record data changes in the table.

Correct Answer: C

QUESTION 4

Which of the following options best defines the Label-Based Access Control (LBAC) feature?

- A. DB2 LBAC allows you to use labels to reference database objects by a short name instead of the full qualified name.
- B. DB2 LBAC lets you decide exactly who has write/read access to individual rows and columns by comparing the security labels between database objects and users.
- C. DB2 LBAC monitors table data access and tables modifications made by database users.
- D. DB2 LBAC is the DB2 authority in charge of issuing GRANT and REVOKE statements.

Correct Answer: B

QUESTION 5

A database administrator retrieved the following status from the DB2 members in a DB2 pureScale environment: Which of the following options will start ONLY the member hosted in NODE102?

ID	HOME_HOST	CUR_HOST	STATE	ALERT
0	NODE101	NODE101	STOPPED	NO
1	NODE102	NODE102	STOPPED	NO
2	NODE103	NODE103	STARTED	NO

- A. db2start member on NODE102
- B. db2start NODE102
- C. db2start member 1
- D. db2cluster -node node102 -exit - maintenance

Correct Answer: C
