**QUESTION 1**

Which utilities could you use to change debugging levels on the vault without having to restart the vault. Select all that apply.

- A. PAR Agent
- B. PrivateArk Server Central Administration
- C. Edit DBParm.ini in a text editor.
- D. Setup.exe

Correct Answer: AB

PAR-Private Ark Remote Control Agent allows you to perform several Vault admin tasks (without restarting the Vault) and view machine statistics.

QUESTION 2**DRAG DROP**

Match the built-in Vault User with the correct definition.

Select and Place:

Answer Area

| | | |
|---|------------------|---------------|
| This user appears on the highest level of the User hierarchy and has all the possible permissions. As such, it can create and manage other Users on any level on the Users' hierarchy. | Drag answer here | Administrator |
| This user appears at the top of the User hierarchy, enabling it to view all the Users in the Safe. The user can produce reports of Safe activities and User activities, which enables it to keep track of activity in the Safe and User requirements. | Drag answer here | Batch |
| This user is an internal user that cannot be logged onto and carries out internal tasks, such as automatically clearing expired user and Safe history. | Drag answer here | Master |
| This user has all available Safe member authorizations except Authorize password requests. This user has complete system control, manages a full recovery when necessary and cannot be removed from any Safe. | Drag answer here | Auditor |

Correct Answer:

**Answer Area**

| | | |
