Match the tool to its capability.

Select and Place:

| | | |
|-----------|------------------|-----------------------|
| Nmap | Drag answer here | network analyzer |
| Nessus | Drag answer here | vulnerability scanner |
| Wireshark | Drag answer here | port scanner |

Correct Answer:

| | | |
|-----------|-----------------------|--|
| Nmap | port scanner | |
| Nessus | vulnerability scanner | |
| Wireshark | network analyzer | |

QUESTION 3

What are two methods to securely transmit personally identifiable information? (Choose two.)

- A. data checksumming
- B. data fragmentation
- C. data encryption
- D. encrypted tunnels

Correct Answer: CD

QUESTION 4

DRAG DROP

Match each type of breach to its consequence.

Select and Place:

| | | |
|---|------------------|---|
| exposed government-protected health information | Drag answer here | financial loss due to loss of competitive advantage |
| exposed proprietary engineering secrets | Drag answer here | public embarrassment and potential financial impact |
| defaced website | Drag answer here | financial loss due to fines/penalties |
| ransomware attack | Drag answer here | financial loss due to downtime |
| retailing loss of credit card numbers | Drag answer here | financial loss due to loss of consumer confidence |

Correct Answer:

| | | |
|---|---|--|
| exposed government-protected health information | financial loss due to fines/penalties | |
| exposed proprietary engineering secrets | financial loss due to loss of competitive advantage | |
| defaced website | public embarrassment and potential financial impact | |
| ransomware attack | financial loss due to downtime | |
| retailing loss of credit card numbers | financial loss due to loss of consumer confidence | |

QUESTION 5

Identify a weakness of a perimeter-based network security strategy to protect an organization's endpoint systems.

- A. It cannot identify command-and-control traffic.
- B. It cannot monitor all potential network ports.
- C. It assumes that all internal devices are untrusted.
- D. It assumes that every internal endpoint can be trusted.

Correct Answer: D
