QUESTION 1

Universal Containers needs to integrate with an external system. The process is initiated when a record is created in Salesforce. The remote system does not require Salesforce to wait for a response before continuing. What should the developer use to accomplish this?

A. Trigger with HTTP callout

B. PushTopic event

C. Outbound message

D. Platform event

Correct Answer: A

QUESTION 2

An org has a custom object, Part__c. Its records are regularly imported from the company\\'s Enterprise Resource Planning (ERP) system. What can be used to ensure the correct Part__c records are updated in Salesforce when imports are made?

A. A Formula field

B. An External ID field

C. A Master-detail field

D. A Lookup field

Correct Answer: B

QUESTION 3

The "Webservice" keyword_____.

A. Method must be static, and class must be global

B. Can be used on all classes

C. Used for any member variables included

D. All of the above

Correct Answer: D

QUESTION 4

Choose the correct definition for .

A. Allows for controller methods to be called directly from Javascript. Must be| encapsulated in tags. Unlike actionSupport, these functions can be called directly from Javascript code

B. Sends an AJAX request according to the time interval you specify. If this ever gets re-rendered, it resets

C. AJAX support to another component (e.g. onClick, onMouseUp, onFocus, etc.)

D. Can be associated with an AJAX request (actionFunction/actionSupport/actionPoller) and shows content conditionally depending on the status of the request (in progress/complete). Use the "id" field to specify name; use "status" field on related components to connect them

E. Signifies which components should be processed by the server when an AJAX request is generated

Correct Answer: A

QUESTION 5

A developer is tasked by Universal Containers to build out a system to track the container repair process. Containers should be tracked as they move through the repair process, starting when a customer reports an issue and ending when the container is returned to the customer.

Which solution meets these business requirements while following best practices?

A. Build a mobile application using Platform Events and RFID integration to ensure proper tracking of the containers and keep the customer informed.

B. Involve a Salesforce administrator and build out a declarative solution that will be easy to maintain and likely cost less than customized development.

C. Build a customized Lightning Application using Application Events to ensure data integrity.

D. Develop a new system with automated notification to move the containers through the repair process while notifying the customer that reported the issue.

Correct Answer: D
