**QUESTION 1**

See the following two screenshots; note how they are different based on the value of Marital Status. What underlying rule can be used to implement this user experience behavior?

The image shows two versions of a user registration form side-by-side. The left form is for a 'Single' user and includes fields for Name, Email, Marital Status (set to 'Single'), Address, City, State, and Postal Code. The right form is for a 'Married' user and includes fields for Name, Email, Marital Status (set to 'Married'), Spouse's Name, Spouse's Email, Address, City, State, and Postal Code. The difference in fields (Spouse's Name and Spouse's Email) is based on the Marital Status selection.

- A. Declare Expression
- B. Decision Tree
- C. When rule
- D. Decision Table

Correct Answer: D
