**QUESTION 1**

You need to update the navigation menu in a portal. Which tool do you use to identify the rule that contains the menu?

- A. The System Management Application (SMA)
- B. Live UI
- C. The Tracer
- D. The Run Rule dialog

Correct Answer: C

QUESTION 2

An agent is configured to run at a 600-second interval with a maximum number of entries set to 50. There are 75 entries in the scheduled queue.

If the agent runs at 2:30 P.M., when does the agent run again?

- A. 600 seconds after the last run started
- B. 600 seconds after the agent activity processes 50 entries
- C. One hour after the last run because the master agent runs only once per hour
- D. Depends on the number of nodes in the cluster

Correct Answer: B

QUESTION 3

A health plan application includes a process for surgical procedure requests. Currently, there is an evaluation subprocess in which a physician reviews the diagnosis and enters the recommended procedure and its urgency. The request then advances to a medical director who analyzes the feedback and approves the appropriate procedure. The health care organization has created a new requirement, which states that three physicians can perform the evaluation independently. Only two evaluations are necessary to advance the case to the medical director.

In order to allow the three physicians to review the orders in parallel, how would you configure the process?

- A. Add a cascading approvals shape that is called by the evaluation subprocess
- B. Add a Split Join shape, add a list of physicians, and call the surgical procedure request process
- C. Add a Split For Each shape, add a list of physicians, and call the evaluation process
- D. Add a Split Join shape, add a list of physicians, and call the evaluation process

Correct Answer: B

**QUESTION 4**

You are configuring duplicate case search logic in a case type. How do you ensure that resolved cases are not evaluated as potential duplicates?

- A. Add a weighted condition where the work status of potential duplicates does not contain "Resolved"
- B. Add a weighted condition where the work status of the current case does not contain "Resolved"
- C. Add a must match condition where the work status of potential duplicates does not contain "Resolved"
- D. Add a must match condition where the work status of the current case does not contain "Resolved"

Correct Answer: A

QUESTION 5

An application contains a rule with an Apply to: class of TGB-HRApps-Work-Review in a locked ruleset. When updating the application, you save the existing rule into a new minor version of the ruleset this time applied to class TGB so it can be used by more than one application.

How do you prevent the application from using the rule in TGB-HRApps-Work-Review?

- A. Save an additional new version of the rule applied to TGB and set the availability of the rule to "Final"
- B. Save an additional new version of the rule applied to TGB-HRApps-Work-Review and set the availability of the rule to "Withdrawn"
- C. Save an additional new version of the rule applied to TGB-HRApps-Work-Review and set the availability of the rule to "Not available"
- D. Save an additional new version of the rule applied to TGB-HRApps-Work-Review and set the availability of the rule to "Blocked"

Correct Answer: B
