**QUESTION 1****DRAG DROP**

You are managing distributed, geographically dispersed, development teams A, B and C.

Team A is ready to merge changes into their development environment to make available changes to Team B's Team C's.

To ensure all development teams are working with the latest version of shared rule base, select and move all of the following tasks to the tasks List Order column and place them in the correct order.

Select and Place:

The screenshot shows a 'Task List' on the left and a 'Task List Order' on the right. The 'Task List' contains five tasks: 'Teams B and C rebase the application rules within their local environment.', 'Automation server merges the branch to the system of record.', 'Automation server requests conflict detection.', 'Team A publishes the branch to the system of record.', and 'System of record triggers the job on the automation server.' The 'Task List Order' is currently empty. Navigation arrows are present between the two columns.

Correct Answer:

The screenshot shows the 'Task List' on the left and the 'Task List Order' on the right. The 'Task List' is empty. The 'Task List Order' contains five tasks in the following order: 'Team A publishes the branch to the system of record.', 'Automation server merges the branch to the system of record.', 'Teams B and C rebase the application rules within their local environment.', 'Automation server requests conflict detection.', and 'System of record triggers the job on the automation server.' Navigation arrows are present between the two columns.

QUESTION 2

What two recommendations do you provide to the development team to ensure the performance of the Pega application does not degrade over time? (Choose Two)

- A. Add indexes to all columns.
- B. Purge workparty UUI index tables periodically.
- C. Schedule scripts to maintain frequently fragmented tables.

D. Purge and/or archive records based on the company's record retention policy.

Correct Answer: CD

QUESTION 3

Select the primary reason for developing a set of unit test cases and automated testing Suites in a continuous integration and continuous deployment (CI/CD) model.

- A. Automated testing reduces costs by reducing the need to hire and train testing resources.
- B. Automated testing accelerates the deployment of rules from the development environment to target environments.
- C. Automated testing programmatically ensures quality of rules to maintain the integrity of the pipeline.
- D. Automated testing allows for orchestration between automation server and the Execute Test REST service.

Correct Answer: B

QUESTION 4

Select two ways for queuing an item for a queue processor. (Choose Two.)

- A. Use the Queue-for-processing method
- B. Use Utility smart shape
- C. Use Run in Background smart shape
- D. Use the Queue for -agent method

Correct Answer: AC

QUESTION 5

Set the three security tasks you perform when deploying an application to a production environment. (Choose Three)

- A. Delete the Unauthenticated access group.
- B. Restrict access to ruleset configuration.
- C. Change the Rule security mode setting on the access groups to Deny.
- D. Rename the PRServlet default servlets.
- E. Update standard dynamic system settings.

Correct Answer: BDE
