**QUESTION 1**

Users in a cloud-based production application report a chronic performance issue that occurs every day between 2:0 P.M. and 4:00 P.M. All attempts to reproduce the problem in the Development, QA, and Staging environments have failed. Which two techniques help you troubleshoot the problem? (Choose Two)

- A. Review Performance Alerts and Exceptions in PDC
- B. Review a Production Tracer Log using SMA
- C. Review Alerts and Exceptions using PLA.
- D. Review Performance Alerts and Exceptions in AES.

Correct Answer: AC

QUESTION 2

Users in a cloud-based production application report a chronic performance issue that occurs every day between 2:00 P.M. and 4:00 P.M. All attempts to reproduce the problem in the Development, QA, and Staging environments have failed. Which two techniques help you troubleshoot the problem? (Choose Two)

- A. Review Performance Alerts and Exceptions in PDC.
- B. Review a Production Tracer Log using SMA.
- C. Review Alerts and Exceptions using PLA.
- D. Review Performance Alerts and Exceptions in AES.

Correct Answer: AC

QUESTION 3

An application contains cases which transition through different statuses throughout their life cycle which typically lasts 3 months.

Design a reporting strategy to display the number of cases by status at the end of each month for a 12-month period.

- A. Configure an agent to record monthly case status in a separate table and report on that table.
- B. Configure an activity to generate the data in the clipboard and report using a custom section.
- C. Configure a summary report that leverages sub reports for each month.
- D. Configure a Declare index to record case data to a separate table.

Correct Answer: B

QUESTION 4

You oversee a medium-size development team, and some of the team members are new to pega. What are the most efficient ways to ensure that the rules the team creates adhere to best practices? (choose two)

- A. Have new team members create and run Pega automated unit tests against their rules.
- B. Use Pega Log Analyzer to identify exceptions associated with the new team members.
- C. Run Tracer on each rule the new team members check in to identify an failures in rule execution.
- D. Leverage the rule check-in approval process to review the new team member\'s changes first.

Correct Answer: BD

QUESTION 5

Which three actions do you recommend to address their performance issue and ensure optimal application performance in the future? (Choose Three.)

- A. Dedicated a node to background processing.
- B. Review application environment sizing.
- C. Remove embedded dashboard reports from the manager portal.
- D. Minimize the usage of robotic automations.
- E. Review selection criteria of agent activities.

Correct Answer: ABE

Explanation: Six weeks after you deliver your application to production, you users report that the application slows down in the afternoon. The application is almost completely unresponsive for some users shortly after 3:00 P.M. Other users

do not experience this problem until later in the day.

You do not have access to the Production environment, but you do have access to AES. The production environment has three nodes and a load balancer. You need to resolve this issue because a new division of the organization will start

using the application next month.
