**QUESTION 1**

You are debugging a script component for your project. When the automation executes your script, the intended result does not occur. You suspect that one or more variables within your script are not being set to the proper value. Your version of Pega Robot Studio does not support the use of breakpoints within the script designer.

In what two ways can you debug the script? (Choose two.)

- A. Enable Runtime logging and enter a diagnostic message to log the variable values during script execution.
- B. Add a breakpoint before calling the script so that you can assign a watch for the variable(s) used within the script.
- C. Check with the Support team to upgrade Robotic Automation Studio to the version which contains script debugging.
- D. Modify the script so that the variable values are returned in the automation.

Correct Answer: AC

---

**QUESTION 2****DRAG DROP**

When interrogating a Windows control, the drag and drop Default interrogation method does not work. You decide to use the Create Control option to interrogate the control. From the Interrogation Steps list, move all of the options to the Ordered Interrogation Steps column and place them in the correct order.

Select and Place:

## Interrogation Steps

On the application's designer tab, select the **Windows** tab.

Navigate to the window containing the control.

Click **List Windows**.

Confirm the control using **Highlight**.

Expand the windows to locate the control.

Select **Create Control** from the right-click menu.

## Ordered Interrogation Steps

Correct Answer:

## Interrogation Steps

## Ordered Interrogation Steps

Navigate to the window containing the control.

On the application's designer tab, select the **Windows** tab.

Expand the windows to locate the control.

Confirm the control using **Highlight**.

Click **List Windows**.

Select **Create Control** from the right-click menu.

### QUESTION 3

You add a MessageDialog component to an automation. Based on the following image, which option shows the configuration settings that generates the message dialog?

- A.
- | Property       | Value                           |
|----------------|---------------------------------|
| messageDialog2 |                                 |
| Show           |                                 |
| caption        | The account does not occur. ... |
| Result         |                                 |
- B.
- | Property       | Value                           |
|----------------|---------------------------------|
| messageDialog2 |                                 |
| Show           |                                 |
| caption        | The account does not occur. ... |
| Result         |                                 |
- C.
- | Property       | Value                           |
|----------------|---------------------------------|
| messageDialog2 |                                 |
| Show           |                                 |
| caption        | The account does not occur. ... |
| Result         |                                 |
- D.
- | Property       | Value                           |
|----------------|---------------------------------|
| messageDialog2 |                                 |
| Show           |                                 |
| caption        | The account does not occur. ... |
| Result         |                                 |

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: D

#### QUESTION 4

The Automation Playback window allows you to \_\_\_\_\_.

A. open a log file and step through it as if you were running your solution in debug mode

B. replay your last Runtime session where the applications are provided with the same account numbers automatically

C. open a log file and debug any exceptions

D. rerun the last automation that ran with the same values as inputs automatically entered

Correct Answer: B

#### QUESTION 5

A developer adds a diagnostic log component to an automation and checks the log file.

Info	02:28:36.568	FM	25	MTA	Playback		CRM_E_CRMChild_Created-64125524	Link*sessionId=0c00d382-ba28-4400-
