QUESTION 1

While interrogating a web application, you come across a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control; the menu displays a drop-down list. How do you interrogate this hidden drop-down list control?

- A. Access the Virtual Controls tab on the adapter tab.
- B. Choose HTML Table Editor from the Interrogation Form dialog box.
- C. Choose Select Element from the Interrogation Form dialog box.
- D. From the Web Controls tab, select the browser and frame, then select List Web controls.

Correct Answer: D

QUESTION 2

DRAG DROP

Pega Robot Studio produces several log files during the opening, building, debugging, and deployment of a solution. In the Answer Area, drag the description of the log file on the left to its correct log file name.

Select and Place:

Answer Area	Description	Log File Name
Includes diagnostic messages from the execution of Robot Studio		OSDLog.txt
Includes diagnostic messages generated when building a Robot Studio project		RuntimeLog.txt
Includes diagnostic messages from the execution of Runtime		StudioLog.txt
Includes diagnostic messages generated when creating a Robot Studio deployment package for a project		OSCLog.txt

Correct Answer:

**Answer Area**

	<u>Description</u>	<u>Log File Name</u>
	Includes diagnostic messages generated when creating a Robot Studio deployment package for a project	OSDLog.txt
	Includes diagnostic messages from the execution of Runtime	RuntimeLog.txt
	Includes diagnostic messages from the execution of Robot Studio	StudioLog.txt
	Includes diagnostic messages generated when building a Robot Studio project	OSCLog.txt

QUESTION 3

An automation requires the web adapter to attach to a running instance of Internet Explorer. How do you achieve this requirement?

- A. Configure the Universal Web adapter and set the StartMethod property to MonitorAll.
- B. Configure the web adapter and set the StartMethod property to MonitorAll.
- C. Configure the web adapter and set the StartMehod property to Attach.
- D. The web adapter cannot connect to a running instance.

Correct Answer: B

QUESTION 4

You have extracted a proxy for a data set and are using it to pass the data into a procedure automation input parameter. In the procedure automation, the data link from the input parameter is not connecting to the stringValue on a stringUtils method.

What two troubleshooting steps do you perform to correct the issue? (Choose two.)

- A. Confirm the proxy data in a messageDialog.
- B. Confirm the stringUtils method works.
- C. Confirm the data type on the procedure automation input parameter.

D. Confirm the proxy's data type matches with the stringUtils method.

Correct Answer: AC

QUESTION 5

You are debugging a script component for your project. When the automation executes your script, the intended result does not occur. You suspect that one or more variables within your script are not being set to the proper value. Your version of Pega Robot Studio does not support the use of breakpoints within the script designer.

In what two ways can you debug the script? (Choose two.)

- A. Enable Runtime logging and enter a diagnostic message to log the variable values during script execution.
- B. Add a breakpoint before calling the script so that you can assign a watch for the variable(s) used within the script.
- C. Check with the Support team to upgrade Robotic Automation Studio to the version which contains script debugging.
- D. Modify the script so that the variable values are returned in the automation.

Correct Answer: AC
