**QUESTION 1**

In an application for configuring hardware equipment for new employees, the manager chooses a laptop model from a drop-down list. The list of available laptop models is maintained in an external system and may change over time. Which of the following do you use as the data source for this drop-down list?

- A. A data page
- B. A local list
- C. A data table
- D. A data transform

Correct Answer: A

QUESTION 2

With Pega's Situational Layer Cake™ approach, how do you configure a regional variation for Human Resources (HR) time off cases?

- A. Create a rule for the variation and add the rule to the common layer of the application.
- B. Create a rule for the variation and add it to a secondary common application layer.
- C. Create a rule for the variation and add the rule to the layer for the region.
- D. Create a rule for the variation and replace the existing HR time off rule in the application common layer.

Correct Answer: B

QUESTION 3

While testing a form, you need to verify the contents of a data page in memory. Which tool do you use to view the current contents of the data page?

- A. Case Designer
- B. The Data Explorer
- C. The Clipboard tool
- D. Live UI

Correct Answer: C

QUESTION 4

What is the relationship between pyWorkPage and case data?

- A. pyWorkPage timestamps all the data generated while creating and processing a case.
- B. pyWorkPage stores all the data pages generated when a case resolves.
- C. pyWorkPage stores all the case data generated while creating and processing a case.
- D. pyWorkPage stores all the data pages generated when a case resolves.

Correct Answer: C

QUESTION 5

You create an application for employees to submit timesheets. Employees enter work, vacation, and sick time for a particular week.

On the entry form, employees see a summary of the total hours entered.

After the employee submits the timesheet, the application displays remaining vacation and sick time for the employee.

You configure the user view that displays remaining vacation and sick time. The balance calculates by subtracting the vacation time and sick time for the week from the current vacation and sick time balances.

Which configuration option is used to summarize the remaining vacation and sick time?

- A. Use a When rule. When the application references the remaining vacation and sick time, each value calculates.
- B. Use declarative processing. Whenever the vacation time or sick time entries change, the remaining vacation and sick time calculate.
- C. Use pyDefault and pySetFieldDefaults. When the process invokes the data transforms, the remaining vacation and sick time calculate.
- D. Use procedural processing with a data transform. Remaining vacation and sick time calculate after the user submits a timesheet.

Correct Answer: B
