**QUESTION 1**

A developer discovers that a calculated property value is returning an unexpected result.

Which two features of the Trace tool allow you to diagnose the problem without affecting application performed? (Choose Two.)

- A. Breakpoints
- B. The Event monitor
- C. The Watch function
- D. The Clipboard tool

Correct Answer: BC

---

**QUESTION 2**

A restaurant has a case type that allows customers to book the dining room for events. Customers provide basic information including party size and indicate whether they want the restaurant to cater the event.

If catering is not required, customers are given a rental rate quote.

If customers indicate that they want the restaurant to cater the event, they must provide menu preference and schedule and appointment to do menu testing before they are given a quote.

Which two options do you use to configure the case type to achieve the requested behavior? (Choose Two.)

- A. Create a check box for customers to indicate whether they want the restaurant to cater the event. Add a decision shape that evaluates whether the customer checks the box.
- B. Create a check box for customers to indicate whether they want the restaurant to cater the event. Configure the menu preferences and appointment date fields with a visibility condition.
- C. Create a process for providing menu preference and scheduling the menu tasting appointment. Create a parallel process for providing the customer with the rental rate quote.
- D. Create a process for customers to indicate menu preference and schedule the menu tasting appointment. Add the process as a case-wide optional action.

Correct Answer: AB

---

**QUESTION 3**

A business architect has developed a new process for a case type. To verify that the UI elements collect the expected results, you want to test the process and the fields. Which two configurations, when used together, allow you to record a set of interactions and save the test results to verify process functionality? (Choose Two)

- A. Add explicit assertions on the UI elements

- B. Add validations on the UI elements
- C. Create a unit test for the case type
- D. Create a scenario test for the case type

Correct Answer: AD

#### QUESTION 4

DRAG DROP

A developer configures a button with the action set as shown in the following image.

Select and Place:

The order ID value is set to the value of the confirmation number if the system confirms the payment.	
A user clicks the button.	
The system applies a data transform.	
The system refreshes the section.	

Correct Answer:

	A user clicks the button.
	The system applies a data transform.
	The order ID value is set to the value of the confirmation number if the system confirms the payment.
	The system refreshes the section.

#### QUESTION 5

Which three options can you configure for a mobile app channel? (Choose Three)

- A. Change the host for a mobile app to a production system, rather than a development system.

- B. Identify how different mobile devices render UI controls.
- C. Establish security behavior for a mobile app, such as the use of biometric identifiers.
- D. Define UI behavior for a view when displayed on a mobile device.
- E. Define the role applied to users when they run the mobile app.

Correct Answer: ACE
