**QUESTION 1**

A global application with infrastructure nodes located throughout the world requires certain operations to start executing at midnight GMT. Select two possible designs for this use case. (Choose Two)

- A. Use the Run in background step in the case life cycle and design a standard queue processor.
- B. Use the Queue-For-Processing method in an activity and design a dedicated queue processor.
- C. Use the Queue-For-Processing method in an activity and design a standard queue processor.
- D. Use the Run in background step in the case life cycle and design a dedicated queue processor.

Correct Answer: BD

---

**QUESTION 2**

A requirement states that when a case is assigned to a user for review, its work status is set to Open-Review. Which two steps do you perform to implement this requirement? (Choose Two)

- A. Configure a data transform to apply the Open-Review status on the appropriate assignments.
- B. Add Open-Review as an allowed status on the case type record.
- C. Create a field value record for the Open-Review status.
- D. Apply the Open-Review status to the appropriate assignments.

Correct Answer: AD

---

**QUESTION 3**

Your application is deployed to the cloud. A data source outside your application populates a data page by using your data access pattern configuration. You receive complaints that the system takes a long time to fetch data each time the case worker accesses information for a different customer.

Which approach solves this performance issue?

- A. Access data page with a predefined key so that, once loaded, data access is faster.
- B. Fetch only the targeted data from the database each time data is needed so access is faster.
- C. Change snapshot data access method to reference pattern data access method.
- D. Move to local installation because network traffic in cloud deployment is often slow.

Correct Answer: A

---

**QUESTION 4**

The primary purpose of a production ruleset is to allow rules to be

- A. tested in a production environment
- B. updated in a production environment
- C. reused in multiple production environments
- D. migrated to a production environment

Correct Answer: D

---

#### QUESTION 5

To reduce training requirements for users, a company wants to utilize the existing front end of their application. How can a third-party application use Pega Platform?

- A. By using middleware tools in application servers
- B. By using database tables for staging the requests
- C. By using REST calls from the Pega API
- D. By exposing third-party application services

Correct Answer: C
