QUESTION 1

You manage Dynamics 365 for a company.

You must prevent users from launching and using Power Automate.

You need to hide the Flow button on the user interface.

Which configuration setting should you change?

- A. the SiteMap
- B. the Customizations section of System Settings
- C. the Entity component of the default solution
- D. the Buttons tab of Flow

Correct Answer: B

QUESTION 2

You need to design the resort portal to meet the business requirements. Which data source should you use?

- A. Microsoft Dataverse
- B. Microsoft Excel
- C. Azure SQL Database
- D. SQL Server

Correct Answer: A

QUESTION 3

DRAG DROP

You are a Dynamics 365 Customer Service developer.

A salesperson creates a chart.

You need to ensure that the chart is available to all users on the team.

Which actions should the salesperson perform? To answer, drag the appropriate actions to the correct users. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Actions

- Share the chart with the team.
- Assign the chart to each person on the team.
- Export the user chart to Microsoft Power BI. Import it as a Power BI visualization.
- Export the user chart for import as a user chart.
- Export the user chart for import as a system chart.

Answer Area

Step	Action
1	Action
2	Action

Correct Answer:

Actions

- Assign the chart to each person on the team.
- Export the user chart to Microsoft Power BI. Import it as a Power BI visualization.
- Export the user chart for import as a system chart.

Answer Area

Step	Action
1	Export the user chart for import as a user chart.
2	Share the chart with the team.

QUESTION 4

The sales manager receives a list of leads from a partner company monthly. The field names that are provided do not match the fields in Dynamics 365. A data map does not exist.

You need to import the leads without changing the data from the partner company.

What should you do?

- A. Create a data map on the first import by using the Import Data wizard.
- B. Add a template for Import Data.
- C. Use Import File Translations.

D. Create a data map in Data Management.

Correct Answer: A

QUESTION 5

HOTSPOT

A company is configuring a Power Apps portal using Microsoft Dataverse.

The company requires the following:

1.
Only authenticated users must be able to sign into the portal.
2.
Authenticated users must have varying degrees of access to the different parts of the portal.
3.
Users must enter one of several external identities when creating an account during the open registration process.
You need to configure user authentication and permissions.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Required for each authenticated user before security can be assigned.

Configuration

Contact table record	
Local user	
Microsoft work or school account	
Account table record	

Component

Required for authenticated users to access restricted pages of the portal.

Configuration

Contact table record	
Local user	
Microsoft work or school account	
Web roles	

Component

Correct Answer:

Required for each authenticated user before security can be assigned.

Configuration

	▼
Contact table record	
Local user	
Microsoft work or school account	
Account table record	

Component

Required for authenticated users to access restricted pages of the portal.

Configuration

	▼
Contact table record	
Local user	
Microsoft work or school account	
Web roles	

Component

Box 1: Contact table record

In Power Apps portals, each authenticated portal user is associated with a contact record in Microsoft Dataverse.

Box 2: Web roles

Portal users must be assigned to web roles to gain permissions beyond unauthenticated users.
