### QUESTION 2

You are developing a Power Automate desktop flow to process new employee documentation. The flow has a variable for confidential bank account numbers.

Users are able to view bank account numbers while the flow is tested. You need to ensure the bank account numbers are not visible in the flow. What should you do?

- A. Turn on Secure Inputs in a cloud flow.
- B. Mark the variable as sensitive.
- C. Change the external name.
- D. Mark variables produced as disabled.

Correct Answer: B

---

### QUESTION 3

You need to implement security to resolve the invoice data issue

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Clear the Create and Delete permissions. Set the Read permission and Write permission values to Organization.
- B. Select the Finance role, select Custom Entities and navigate to the table.
- C. In Microsoft Power Platform admin center, navigate to the Users section.
- D. In Microsoft Power Platform admin center, navigate to the Security roles section.
- E. Clear the Create and Delete permissions. Set the Read permission and Write permission values to Business unit.
- F. Select the Finance role select Core Records, and then navigate to the table.

Correct Answer: BDE

To implement security to resolve the invoice data issue, you need to perform three actions:

1.

In Microsoft Power Platform admin center, navigate to the Security roles section. This is where you can manage the security roles for your environment and assign them to users or teams.

2.

Select the Finance role, select Custom Entities and navigate to the table. This is where you can configure the access level for each entity in your environment based on your security role.

3.

Clear the Create and Delete permissions. Set the Read permission and Write permission values to Business unit. This will restrict users with this role from creating or deleting records in this table, but allow them to read or write records within their business unit.

---

#### QUESTION 4

##### HOTSPOT

You are developing automation for an application.

You plan to use the application on legacy desktop applications and browser applications.

You need to select the appropriate scripting language based on the requirements.

Which scripting language action should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

#### Requirement

Automate SAP.

#### Scripting language action

	▼
Run VBScript	
Run JavaScript function on webpage	
Run PowerShell script	
Run Python script	

Automate website.

	▼
Run VBScript	
Run JavaScript function on webpage	
Run PowerShell script	
Run Python script	

Create new scheduled task on Windows.

	▼
Run VBScript	
Run JavaScript function on webpage	
Run PowerShell script	
Run Python script	

Silently run console application.

	▼
Run JavaScript function on webpage	
Run Python script	
Run VBScript	
Run DOS command	

Correct Answer:

### Answer Area

### QUESTION 5

DRAG DROP A company stores confidential documents in a SharePoint document library. A developer must create an automation solution in a default environment that processes documents from the SharePoint library and uploads approved documents to Azure File Storage for archiving purposes. The automation must meet the

following requirements:

1. Prevent modification or deletion of approved documents from Azure File Storage.
2. Prevent sharing of documents from SharePoint or Azure File Storage.

You need to configure a data loss prevention (DLP) policy.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

### Actions

Set the policy scope to **Exclude certain environments** and add the default environment.

Add the SharePoint and Approvals connectors to the Business category.  
Add the Azure File Storage connector to the Blocked category.

Configure Azure File Storage connector actions.

Set the policy scope to **Add multiple environments** and add the default environment.

Add the SharePoint, Azure File Storage, and Approvals connectors to the Business category.

Add the SharePoint, Azure File Storage, and Approvals connectors to the Non-business category.

Confirm and save the policy.

Create a new data policy in the Microsoft Power Platform admin center.

### Answer Area

Correct Answer:

## Actions

Set the policy scope to **Exclude certain environments** and add the default environment.

Add the SharePoint and Approvals connectors to the Business category.  
Add the Azure File Storage connector to the Blocked category.

Add the SharePoint, Azure File Storage, and Approvals connectors to the Non-business category.

## Answer Area

Create a new data policy in the Microsoft Power Platform admin center.

Add the SharePoint, Azure File Storage, and Approvals connectors to the Business category.

Configure Azure File Storage connector actions.

Set the policy scope to **Add multiple environments** and add the default environment.

Confirm and save the policy.
