### QUESTION 1

You create a business rule on contact entity to enforce the requirement that users must enter either a telephone number, fax number, or an email when creating a new record.

The company decides to remove fax number from the condition.

You need to update the business rule.

What are two ways of achieving the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Save a copy of the rule and change the condition. Deactivate and delete the original rule.
- B. Deactivate the business rule and change the condition.
- C. Take a snapshot of the business rule and change the condition.
- D. Change the condition and activate the change.

Correct Answer: AB

### QUESTION 2

#### DRAG DROP

You need to explain the major components of the Common Data Model (CDM) and their functions.

Match each term to its definition.

Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.

NOTE: Each correct selection is worth one point.

Select and Place:

**Tools**

- 
- 
- 
- 
- 
- 

**Answer Area**

Purpose	Tool
Helps jumpstart application development by leveraging business logic, security, and integrations.	<input type="text" value="Tool"/>
A set of records used to store data.	<input type="text" value="Tool"/>

Correct Answer:

**Tools**

- 
- 
- 
- 
- 
- 

**Answer Area**

Purpose	Tool
Helps jumpstart application development by leveraging business logic, security, and integrations.	<input type="text" value="Microsoft Power Platform"/>
A set of records used to store data.	<input type="text" value="Entities"/>

**Box 1: Microsoft Power Platform**

Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform – providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.

The Microsoft Power platform brings all your data together into a common data model.

**Box 2: Entities**

An entity is a set of records used to store data, similar to how a table stores data within a database.
