**QUESTION 1**

DRAG DROP

You need to create a mobile application which will allow sales associates to enter customer sales leads.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Save the app.	
Add components to the app.	
Publish the app.	
Add flows to the app.	
Go to the Office 365 admin center.	
Create a new Power Apps app.	

Correct Answer:

	Create a new Power Apps app.
	Add components to the app.
	Save the app.
Add flows to the app.	Publish the app.
Go to the Office 365 admin center.

## QUESTION 2

### DRAG DROP

You manage the support team at a rapidly growing company.

Customers and support technicians need a better experience when logging and responding to support requests. You need more visibility into what the support technicians are doing every week.

You need to recommend tools to help the company's needs.

Which tools should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

**Tools**

- Power Apps portal
- Power Automate
- Power BI
- Common Data Service

**Answer Area**

	<b>Requirement</b>	<b>Tool</b>
	Customers must be able to submit support requests by using a website.	
	Support requests must be created and stored.	
	Support technicians must be notified when a new support request is entered.	
	Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	

Correct Answer:

**Tools**

- 
- 
- 
- 

**Answer Area**

	<b>Requirement</b>	<b>Tool</b>
	Customers must be able to submit support requests by using a website.	Power BI
	Support requests must be created and stored.	Common Data Service
	Support technicians must be notified when a new support request is entered.	Power Automate
	Support technicians must be able to enter a status report for work completed during the previous week by using a mobile app.	Power Apps portal

**QUESTION 3**

**HOTSPOT**

You are building Power BI visualizations for a team.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

### Answer Area

Statements	Yes	No
Power BI can only retrieve data from up to two different sources for each dashboard.	<input type="radio"/>	<input type="radio"/>
Power BI visualizations can be used in canvas apps and model driven apps.	<input type="radio"/>	<input type="radio"/>
Power BI can display charts and list boxes on dashboards.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

### Answer Area

Statements	Yes	No
Power BI can only retrieve data from up to two different sources for each dashboard.	<input type="radio"/>	<input checked="" type="radio"/>
Power BI visualizations can be used in canvas apps and model driven apps.	<input checked="" type="radio"/>	<input type="radio"/>
Power BI can display charts and list boxes on dashboards.	<input checked="" type="radio"/>	<input type="radio"/>

<https://docs.microsoft.com/en-us/power-bi/visuals/power-bi-visualization-slicers>

### QUESTION 4

A company is creating a canvas app to display data from a legacy system that is located on the company's internal network.

You need to connect to the data.

What should you use?

- A. custom connector
- B. content pack

- C. data gateway
- D. Power Automate

Correct Answer: C

A data gateway is used to securely connect to on-premises data sources, such as a legacy SQL Server database, from the cloud. It acts as a bridge between the on-premises data source and the cloud-based app, such as the canvas app in this scenario. The data gateway handles the communication between the app and the database, and allows for secure, real-time data access. A custom connector, content pack, and Power BI may also be used in conjunction with the data gateway, but the data gateway is specifically designed for connecting to on-premises data sources.
