**QUESTION 1**

Ideally, who should be in charge of logging all changes in production?

- A. Product Manager
- B. Administrator
- C. QA Engineer
- D. Developer

Correct Answer: B

QUESTION 2

UVC has created the custom objects Candidate and Interview in Salesforce to track candidates and interviews respectively. The company wants to track the total number of interviews a candidate has gone through on the candidate record without writing any code. Which two actions can an App Builder take to accomplish this requirement? Choose 2 answers

- A. Use a formula field on the Candidate record to show the total number of interviews
- B. Use a lookup relationship between the Candidate and Interview objects (Your Answer)
- C. Use a MD relationship between the Candidate and Interview Objects
- D. Use a roll-up summary field on the Candidate record to show the total number of interviews

Correct Answer: CD

QUESTION 3

An app builder is preparing to deploy a new app from the sandbox to production using change sets. What two considerations should an app builder keep in mind during this process? (Choose two.)

- A. Users should be logged out of production when receiving inbound change sets.
- B. Change sets do not include all components and may have to perform some changes manually.
- C. Salesforce Connect automatically establishes a link between environments.
- D. Transactions will revert if the deployment errors.

Correct Answer: BD

QUESTION 4

Cloud Kicks (CK) wants to set up a custom child object to track gift cards issued to a customer. A key requirement is to track the total number of gift cards opened and gift cards issued on an Account. CK wants to permanently ensure the gift cards are unable to be moved across any other Account once it is created.

On the gift card object, what type of field should be created to support this requirement?

- A. Formula
- B. Master-detail relationship
- C. Poll-up summary
- D. Lookup relationship

Correct Answer: B

QUESTION 5

Universal Containers allows users to create standard reports on demand.

What are two considerations users should be aware of when creating a new report? (Choose two.)

- A. Users can require that child objects exist for parent records using a cross filter
- B. Records will be available in the report regardless of security permissions
- C. Reports created from standard report types are available to all users
- D. The report type determines the types of records and fields that will be available

Correct Answer: AC
