QUESTION 1

When applying a reference table in the Labeler in token mode which of the following statements is correct?

- A. The order of the reference tables defined will not impact your results displayed
- B. Selecting Inclusive mode will output items that are present in the reference table under the label provided
- C. Selecting Exclusive mode will exclude items that are present in the reference table
- D. Any items that do not appear in the reference table are not displayed in the output

Correct Answer: B

QUESTION 2

When would you use the DQA?

- A. On suspect/exception records that fall out of a profile, standardization or matching process in IDQ
- B. On records that could not be matched in a matching mapping
- C. On records that are output from the Consolidation transformation
- D. On records that are output from the Association transformation

Correct Answer: C

QUESTION 3

When you select Suggestion List mode what statement is true?

- A. The Address Validator transformation searches the address reference data and returns all addresses that are possible matches with the input address.
- B. The Address Validator transformation searches the address reference data and returns the most likely candidate address.
- C. The Address Validator transformation parses data into the suggested address fields without performing validation.
- D. The Address Validator transformation will return various cleansed standardized versions of the input record for the user to choose from.

Correct Answer: A
