---

### QUESTION 2

Your organization's Sales Department uses a generic user account (sales@company.com) to manage requests. With only one employee responsible for managing the departmental account, you are tasked with providing the department with the most efficient means to allow multiple employees various levels of access and manage requests from a common email address.

What should you do?

- A. Configure a Google Group as an email list.
- B. Delegate email access to department employees.
- C. Configure a Google Group as a collaborative inbox.
- D. Configure a Google Group, and set the Access Level to Announcement Only.

Correct Answer: D

---

### QUESTION 3

Your company works regularly with a partner. Your employees regularly send emails to your partner's employees. You want to ensure that the Partner contact information available to your employees will allow them to easily select Partner names and reduce sending errors.

What should you do?

- A. Educate users on creating personal contacts for the Partner Employees.
- B. Add a secondary domain for the Partner Company and create user entries for each Partner user.
- C. Create shared contacts in the Directory using the Directory API.

D. Create shared contacts in the Directory using the Domain Shared Contacts API.

Correct Answer: D

---

#### QUESTION 4

Your organization has implemented Single Sign-On (SSO) for the multiple cloud-based services it utilizes. During authentication, one service indicates that access to the SSO provider cannot be accessed due to invalid information.

What should you do?

- A. Verify the NameID Element in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- B. Verify the Audience Element in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- C. Verify the Subject attribute in the SAML Response matches the Assertion Consumer Service (ACS) URL.
- D. Verify the Recipient attribute in the SAML Response matches the Assertion Consumer Service (ACS) URL.

Correct Answer: B

---

#### QUESTION 5

Your organization is concerned with the increasing threat of phishing attacks that may impact users. Leadership has declined to force-enable 2-Step verification. You need to apply a security measure to prevent unauthorized access to user accounts.

What should you do?

- A. Enable Enforce Strong Password policy.
- B. Enable Employee ID Login Challenge.
- C. Decrease the Maximum User Session Length.
- D. Revoke token authorizations to external applications.

Correct Answer: D
