**QUESTION 1**

What is a unit test?

- A. A technique for ensuring that units of co-dependent systems integrate correctly
- B. A way to ensure product code satisfies the user requirements
- C. A test that isolates and verifies individual units of functionality
- D. A test that ensures a specific method integrates properly with the code calling it

Correct Answer: C

A unit test is a test that isolates and verifies the functionality of one unit.

QUESTION 2

The CEO demands a feature from the developers during the sprint. What should the developers do?

- A. Add the item to the next sprint
- B. Add the item to the current sprint and work harder
- C. Add the item to the current sprint and leave out something that is less important
- D. Inform the product owner, so the PO can deal with the CEO

Correct Answer: D

This is not a decision the CEO or the developers can make, this should go via the PO, since that is the maximizer of value

QUESTION 3

The role of the scrum master during the daily scrum is:

- A. Manage the meeting
- B. All of these
- C. Lead the discussion
- D. Ensure that the meeting takes place and that its timebox won't be exceeded
- E. Make sure all three questions of the daily scrum are answered

Correct Answer: E

The scrum master doesn't need to be present during the daily scrum. Neither does the daily scrum need to consist of three questions, which is a commonly chosen format though.

QUESTION 4

What is a sprint burn down chart?

- A. Visual representation of work that is still to do and time that is left
- B. A chart showing progress towards the product goal
- C. A chart that shows whether bugs came up
- D. Visual representation of the product backlog items left

Correct Answer: A

QUESTION 5

When is it most appropriate for developers to change the Definition of Done

- A. During the sprint planning when they can't fit enough into the sprint
- B. Prior to starting a new sprint
- C. In the retrospective when it turns out they can improve quality
- D. Prior to starting a new project

Correct Answer: C

The definition of done can be changed when more is learnt. This always needs to be done aiming at a high quality usable increment. The best time to reflect on this is the retrospective.
