QUESTION 1

What is the size of the scrum team?

A. typically 10 or fewer people

B. this differs every sprint

C. at least 8 people

D. 3 to 11

Correct Answer: A

The scrum guide says: "The Scrum Team is small enough to remain nimble and large enough to complete significant work within a Sprint, typically 10 or fewer people. "

QUESTION 2

What relation does scrum have to development practices?

A. Scrum requires a specific set of development practices

B. Scrum is complemented by good development practices

C. Scrum requires all development practices

D. Scrum has no relationship to development practices

Correct Answer: B

Scrum requires no development practices, but good development practices do help and make scrum more successful.

QUESTION 3

When should the developers create their first automated build?

A. Just before the first check-in

B. Just before the product is released

C. When the product owner asks for a build

D. Just before the end of the sprint

E. As soon as there is code in the version control system

Correct Answer: E

Automated builds should be changed everytime the codebase gets changed. This happens the first time when the first bit of code gets added to the version control system.

QUESTION 4

What does a test written with TDD represent?

A. A technical requirement that must be satisfied

B. A bug

C. Great development practices

D. Something that completes the test coverage of a system

Correct Answer: A

The test gets written first in TDD, after that, the production code will be written to satisfy the test.

QUESTION 5

What is an integration test?

A. A test of the user interface

B. A test that runs during a continuous integration build

C. A test of multiple units of functionality

D. A test of a single unit of functionality

Correct Answer: C

An integration test is a test of multiple units of functionality.
