**QUESTION 1**

An Administrator has identified an EPM-triggered false positive and has used the Create Rule button from within the relevant entry in the Security Events > Preventions > Exploits tab. What is the result of the created rule?

- A. The new rule stops all EPM injection into the faulted process.
- B. The new rule stops all EPM injection into processes on the machine on which the prevention was triggered.
- C. The new rule excludes the endpoint from Traps protection.
- D. The new rule will include the EPM that raised the prevention, the process that triggered the prevention, the machine on which the prevention was triggered, and a descriptive name for the rule.

Correct Answer: B

---

**QUESTION 2**

Which two are valid optional parameters when upgrading Traps agent from the ESM console using Upgrade from path? (Choose two.)

- A. Conditions
- B. Processes
- C. ESM Server
- D. Target Objects
- E. Features

Correct Answer: AD

---

**QUESTION 3**

The ESM policy is set to upload unknowns to WildFire. However, when an unknown is executed the Upload status in ESM Console never displays "Upload in progress", and the verdict remains local analysis or unknown. Even clicking the upload button and checking in does not resolve the Issue. A line in the log file suggests not being able to download a file from "https://ESMSERVER/BitsUploads/... to C:\ProgramData\Cyvera\Temp\..."

Which solution fixes this problem?

- A. Restart BITS service on the endpoint
- B. Restart BITS service on ESM
- C. Remove and reinstall all the agents without SSL
- D. In the ESM Console, use the FQDN in multi ESM

Correct Answer: B

---

**QUESTION 4**

Uploads to the ESM Sever are failing.

How can the mechanism for forensic and WildFire uploads be tested from the endpoint?

- A. Use BITS commands in PowerShell to send a file to the ESM Server
- B. Use curl to execute a POST operation
- C. Use SCP commands from a ssh client to transfer a file to the ESM Server
- D. Click Check-in now in the agent console

Correct Answer: D

---

**QUESTION 5**

A company is using a Web Gateway/Proxy for all outbound connections. The company has deployed Traps within the domain and in testing, discovered that the ESM Servers are unable to communicate with WildFire. All other Traps features are working.

What is the most likely cause of the issue?

- A. The administrator needs to configure WildFire proxy settings in each Agent Console.
- B. The administrator needs to configure WildFire proxy settings in the ESM Console and in each Agent Console.
- C. The Administrator needs to purchase the additional site license required for WildFire.
- D. The Administrator needs to configure WildFire proxy settings in the ESM Console.

Correct Answer: D
