Following Questions and Answers are all new published by Palo Alto Networks Official Exam Center

QUESTION 1

Which two key benefits have been identified for a customer investing in the Palo Alto Networks Prisma secure access service edge (SASE) solution? (Choose two.)

A. decreased likelihood of a data breach

B. reduced input required from management during third-party investigations

C. decreased need for interaction between branches

D. reduced number of security incidents requiring manual investigation

Correct Answer: BD

QUESTION 2

How does the secure access service edge (SASE) security model provide cost savings to organizations?

A. The single platform reduces costs compared to buying and managing multiple point products.

B. The compact size of the components involved reduces overhead costs, as less physical space is needed.

C. The content inspection integration allows third-party assessment, which reduces the cost of contract services.

D. The increased complexity of the model over previous products reduces IT team staffing costs.

Correct Answer: C

QUESTION 3

Which product enables websites to be rendered in a sandbox environment in order to detect and remove malware and threats before they reach the endpoint?

A. remote browser isolation

B. secure web gateway (SWG)

C. network sandbox

D. DNS Security

Correct Answer: B

QUESTION 4

What is a key benefit of CloudBlades?

A. automation of UI workflow without any code development and deployment of Prisma SD-WAN ION devices

B. utilization of near real-time analysis to detect previously unseen, targeted malware and advanced persistent threats

C. identification of port-based rules so they can be converted to application-based rules without compromising application availability

D. configuration of the authentication source once instead of for each authentication method used

Correct Answer: A

QUESTION 5

Which action protects against port scans from the internet?

A. Apply App-ID Security policy rules to block traffic sourcing from the untrust zone.

B. Assign Security profiles to Security policy rules for traffic sourcing from the untrust zone.

C. Apply a Zone Protection profile on the zone of the ingress interface.

D. Assign an Interface Management profile to the zone of the ingress surface.

Correct Answer: C
