QUESTION 1

How does SaaS Security Inline help prevent the data security risks of unsanctioned security-as-a-service (SaaS) application usage on a network?

- A. It provides mobility solutions and/or large-scale virtual private network (VPN) capabilities.
- B. It offers risk scoring, analytics, reporting, and Security policy rule authoring.
- C. It provides built-in external dynamic lists (EDLs) that secure the network against malicious hosts.
- D. It prevents credential theft by controlling sites to which users can submit their corporate credentials.

Correct Answer: C

QUESTION 2

How does a secure web gateway (SWG) protect users from web-based threats while still enforcing corporate acceptable use policies?

- A. Users are mapped via server logs for login events and syslog messages from authenticating services.
- B. It uses a cloud-based machine learning (ML)-powered web security engine to perform ML-based inspection of web traffic in real-time.
- C. It prompts the browser to present a valid client certificate to authenticate the user.
- D. Users access the SWG, which then connects the user to the website while still performing security measures.

Correct Answer: D

QUESTION 3

Which product enables websites to be rendered in a sandbox environment in order to detect and remove malware and threats before they reach the endpoint?

- A. remote browser isolation
- B. secure web gateway (SWG)
- C. network sandbox
- D. DNS Security

Correct Answer: B

QUESTION 4

Which application gathers health telemetry about a device and its WiFi connectivity in order to help determine whether

the device or the WiFi is the cause of any performance issues?

- A. data loss prevention (DLP)
- B. remote browser isolation (RBI)
- C. Cortex Data Lake
- D. GlobalProtect

Correct Answer: C

QUESTION 5

How does the Palo Alto Networks secure access service edge (SASE) solution enable Zero Trust in a customer environment?

- A. It stops attacks that use DNS for command and control or data theft.
- B. It feeds threat intelligence into an automation engine for rapid and consistent protections.
- C. It classifies sites based on content, features, and safety.
- D. It continuously validates every stage of a digital interaction.

Correct Answer: D
