### QUESTION 1

Which element of a secure access service edge (SASE)-enabled network uses many points of presence to reduce latency with support of in-country or in-region resources and regulatory requirements?

- A. cloud-native, cloud-based delivery
- B. converged WAN edge and network security
- C. broad network-edge support
- D. identity and network location

Correct Answer: A

---

### QUESTION 2

Organizations that require remote browser isolation (RBI) to protect their users can automate connectivity to third-party RBI products with which platform?

- A. Zero Trust
- B. SaaS Security API
- C. GlobalProtect
- D. CloudBlades API

Correct Answer: A

---

### QUESTION 3

Cloud-delivered App-ID provides specific identification of which two applications? (Choose two.)

- A. unknown-tcp
- B. private
- C. web-browsing
- D. custom

Correct Answer: AC

---

### QUESTION 4

What is a benefit of a cloud-based secure access service edge (SASE) infrastructure over a Zero Trust Network Access (ZTNA) product based on a software-defined perimeter (SDP) model?

- A. Users, devices, and apps are identified no matter where they connect from.
- B. Connection to physical SD-WAN hubs in their locations provides increased interconnectivity between branch offices.
- C. Complexity of connecting to a gateway is increased, providing additional protection.
- D. Virtual private network (VPN) services are used for remote access to the internal data center, but not the cloud.

Correct Answer: A

---

#### QUESTION 5

How does Autonomous Digital Experience Management (ADEM) improve user experience?

- A. The root cause of any alert can be viewed with a single click, allowing users to swiftly stop attacks across the environment.
- B. The virtual appliance receives and stores firewall logs without using a local Log Collector, simplifying required steps users must take.
- C. Working from home or branch offices, all users get the benefit of a digital experience management solution without the complexity of installing additional software and hardware.
- D. It applies in-depth hunting and forensics knowledge to identify and contain threats before they become a breach.

Correct Answer: C
