QUESTION 1

What is a technical benefit of User-ID in relation to policy control?

- A. It matches traffic against policy to check whether it is allowed on the network.
- B. It allows all users to designate view-only access to itinerant personnel.
- C. It improves safe enablement of applications traversing the network.
- D. It encrypts all private keys and passwords in the configuration.

Correct Answer: B

QUESTION 2

A customer has enabled the Threat Prevention subscription on their Palo Alto Networks Next-Generation Firewall.

How will the performance of the firewall be affected if the customer also enables both WildFire and User-ID?

- A. The maximum throughput performance will be reduced, but the impact will vary based on the firewall model being used.
- B. Enabling User-ID will have no additional performance impact, but enabling WildFire will reduce throughput.
- C. There will be no additional performance impact to the firewall, and throughput will remain the same, regardless of firewall model.
- D. Enabling WildFire will have no additional performance impact, but enabling User-ID will reduce throughput.

Correct Answer: C

QUESTION 3

In which two of the following scenarios is personal data excluded from protection under the General Data Protection Regulation (GDPR)?

Select 2 Correct Responses

- A. The data was automated as part of an information filing system.
- B. The data was generated in the course of a purely personal or household activity.
- C. The data will be used for the prevention of criminal offenses.
- D. The data is related to a person's economic or cultural identity.

Correct Answer: AC

QUESTION 4

Which Next-Generation Firewall (NGFW) deployment model allows an organization to monitor traffic during evaluations without interruption to network traffic?

- A. Layer 2
- B. TAP mode
- C. virtual wire
- D. Layer 3

Correct Answer: B

QUESTION 5

Which of the following statements applies to enabling App-ID on a Next-Generation Firewall (NGFW)?

- A. No additional purchase is required, but App-ID must be enabled for the customer to use it.
- B. An App-ID subscription must be purchased and enabled.
- C. No configuration is required, because App-ID is always enabled by default.
- D. A Threat Protection license must be purchased and enabled.

Correct Answer: C
