QUESTION 1

Given: You are being interviewed by ABC Company for employment as a wireless site survey engineer. The interviewing manager asks you what items should be included in a manual RF site survey report.

What answer would be accurate? (Choose two)

A. Itemized list of equipment, licenses, and support contracts required for the facility

B. RF heat map illustrating coverage and signal quality for each frequency band

C. Documentation noting physical security hazards in the RF coverage area

D. Documentation noting where each access point will be placed and how it will be mounted

E. Documentation noting how each WLAN user group will authenticate to the network

Correct Answer: BD

QUESTION 2

What statements describe industry practices for communication protocols between WLAN controllers and controller-based APs? (Choose two)

A. All vendors use the same protocol so that APs will interoperate with WLAN controllers from other vendors.

B. Some vendors use proprietary protocols, and some vendors use protocols based on public standards like RFCs.

C. For most vendors, the controller-based APs maintain data and control tunnels with at least two controllers for immediate failover and redundancy.

D. All vendors support at least one L2 or L3 broadcast protocol for controller discovery by controller- based APs.

E. All vendors recommend using L2 (instead of L3) controller discovery and tunneling protocols in large enterprises.

Correct Answer: BD

QUESTION 3

Given: As you prepare for a site survey in a hospital, you have learned about several wireless devices that support connection-oriented, real-time applications. These applications are sensitive to service interruptions and require excellent signal quality, low latency, and low loss. For that reason, it is important to identify sources of RF interference as well as building characteristics that would cause RF blockage or dead spots.

What systems or environmental characteristics are most likely to cause interference or RF blockage and disrupt service for these applications? (Choose two)

A. Microwave ovens

B. Long hallways

C. Elevator shafts

D. RFID chokepoints

E. Drywall offices

Correct Answer: AC

QUESTION 4

What statement about 802.11 WLAN performance is true?

A. Use of larger frame sizes results in greater throughput in low interference environments.

B. BSS support for 65 KB A-MPDUs will increase the maximum data rate available to client devices.

C. In 802.11n, changing the security mechanism from WPA2-Personal to WPA2-Enterprise will enable the HT MCS rates.

D. Compared to an Independent BSS, an Infrastructure BSS can provide almost twice the throughput between wireless nodes.

E. Use of short guard intervals improves reliability and throughput in high multipath environments

Correct Answer: A

QUESTION 5

Given: XYZ Company has decided to install an 802.11 WLAN system that will support 1000 wireless users, but they are concerned about network security. XYZ is interested in deploying standardized security features. In addition to WPA2Enterprise with PEAP and role-based access control, XYZ would like to support management frame protection as well as a fast secure roaming protocol for future mobile handsets.

As XYZ Company selects a product to deploy, what two IEEE amendments should be supported to provide the management frame protection and fast secure roaming security features? (Choose two)

A. 802.11j

B. 802.11p

C. 802.11r

D. 802.11u

E. 802.11w

F. 802.11z

Correct Answer: CE
